Shadows in the Sea Harold Weber McCormick, Thomas B. Allen, William Edward Young, 2012-09-01 *Shadows in the Sea* Thomas B. Allen, 1996 Shadows in the Sea Harold W. McCormick, 2017-08-08 Captain Young and I for some years have been gathering material from all over the world about the Selachians the Sharks Skates Rays and their allies of which there are more than 600 known species We originally intended merely to up date Captain Young s book *Shark Shark* published by Gotham House in 1934 and now a collector s item but as the material ever expanded it was decided that an entirely new book covering a much broader field was needed Adaterial was collected from all over the world for many years When Captain Young and I felt that the research was nearly completed we called upon Tom Allen an experienced newspaperman to aid us in transforming the research material into a book Tom and I continued the research up to and beyond the completion of the manuscript Tom also did further research and added new material in the course of writing the book In all scientific classifications the Selachians are separated clearly from the Teleosteans or Bony Fishes and there are even leading ichthyologists ho do not regard the former as fishes at all but rather as representing a separate and distinct Class of animal life *Shadows in the Sea* Harold Weber McCormick, Thomas Benton Allen, 1963 *Shadows in the Sea. The Sharks, Skates and Rays. Illustrated. [By] Harold W. McCormick and Tom Allen with Captain William E. Young* Harold Weber MACCORMICK, Thomas Benton ALLEN, William Edward YOUNG, 1964 *Sharks, Skates, Rays, and Chimaeras* John Richard Thompson, Stewart Springer, 1965 Biomechanics of Feeding in Vertebrates V.L. Bels, M. Chardon, P. Vandewalle, 2012-12-06 Although feeding is not yet been thoroughly studied in many vertebrates taxa and different conceptual and methodological approaches of the concerned scientists make a synthesis difficult the aim of the editors is to provide a comprehensive overview of the feeding design in aquatic and terrestrial vertebrates with a detailed description of its functional properties The book emphasizes the constant interaction between function and form behaviour and morphology in the course of evolution of the feeding apparatus and way of feeding both complementary and basically related to survival interspecific competition adaptation to environmental changes and adaptive radiations Special stress is drawn on quantification of the observational and experimental data on the morphology and biomechanics of the feeding design and its element jaws teeth hyoid apparatus tongue in order to allow present and further comparisons in an evolutionary perspective Sharks, Sawfish, Skates, and Rays of the Carolinas Frank Joseph Schwartz, 1984 Catalog of Copyright Entries. Peschak, 2014-02-27 At once feared and revered sharks have captivated people since our earliest human encounters Children

and adults alike stand awed before aquarium shark tanks fascinated by the giant teeth and unnerving eyes And no swim in the ocean is undertaken without a slight shiver of anxiety about the very real and very cinematic dangers of shark bites But our interactions with sharks are not entirely one sided the threats we pose to sharks through fisheries organized hunts and gill nets on coastlines are more deadly and far reaching than any bite In *Sharks and People* acclaimed wildlife photographer Thomas Peschak presents stunning photographs that capture the relationship between people and sharks around the globe A contributing photographer to National Geographic Peschak is best known for his unusual photographs of sharks his iconic image of a great white shark following a researcher in a small yellow kayak is one of the most recognizable shark photographs in the world The other images gathered here are no less riveting bringing us as close as possible to sharks in the wild Alongside the photographs *Sharks and People* tells the compelling story of the natural history of sharks Sharks have roamed the oceans for more than four hundred million years and in this time they have never stopped adapting to the ever changing world their unique cartilage skeletons and array of super senses mark them as one of the most evolved groups of animals Scientists have recently discovered that sharks play an important role in balancing the ocean including maintaining the health of coral reefs Yet tens of millions of sharks are killed every year just to fill the demand for shark fin soup alone Today more than sixty species of sharks including hammerhead mako and oceanic white tip sharks are listed as vulnerable or in danger of extinction The need to understand the significant part sharks play in the oceanic ecosystem has never been so urgent and Peschak s photographs bear witness to the thrilling strength and unique attraction of sharks They are certain to enthrall and inspire
