Shadows Of Africa:

Africa's Shadow Rise Pádraig Carmody, Peter Kragelund, Ricardo Reboledo, 2020-09-17 For years economists have spoken of Africa rising and despite the global financial crisis Africa continues to host some of the fastest growing economies in the world Africa's Shadow Rise however argues that the continent's apparent economic rise is essentially a mirage driven by developments elsewhere most particularly the expansion in China's economy While many African countries have experienced high rates of growth much of this growth may prove to be unsustainable and has contributed to environmental destruction and worsening inequality across the continent Similarly new economic relationships have produced new forms of dependency as African nations increasingly find themselves tied to the fortunes of China and other emerging powers Drawing on in depth fieldwork in southern Africa Africa's Shadow Rise reveals how the shifting balance of global power is transforming Africa's economy and politics and what this means for the future of development efforts in the region

Shortlisted for the Business Council for Africa's African Business Book of the Year 2023 **The Modern African State** Godfrey Mwakikagile, 2001 This book examines the modern African State as a fragile institution because of its structural flaws It focuses on a number of African countries whose combined analyses provide a focal point for looking at the whole continent as one giant place with crumbling state institutions whose fragility threatens the very existence of several African countries Even in rich African countries peace and stability is threatened and rampant corruption and dictatorship Nothing better demonstrates the weakness and cruelty of the modern African State than its willingness to instigate tribal violence in a number of African countries and its inability to contain such hostilities in many others In an attempt to put such weakness in proper perspective the author focuses on analyses of case studies as the context for a better understanding of the modern African State as the most dominant institution on the African continent *South Asia and Africa After Independence*

Bernard Waites, 2012-01-17 Post colonial South Asia and Africa invite comparison along with their political boundaries they inherited from colonial regimes administrative languages a cluster of sovereign state institutions and modern economic nuclei When they became independent South Asian and African states were for all their diversity thrust into a common position in the international system and embarked on a common history as emergent non aligned developing nations This is the first book to offer a single volume comparative history of postcolonial South Asia and sub Saharan Africa in the first generation since independence South Asia and Africa After Independence draws together the political and economic history of these two regions assessing the colonial impact establishing breaks and continuities and highlighting their diversity and interplay Waites sets out a framework for analysing the first generation of post colonial history offering an interpretation of post colonialism as a historical phenomenon and provocatively challenging us to re think this term in relation to South Asian and African history This book is an important reference for the study of global world African and South Asian history

South Africa Pushed to the Limit Hein Marais, 2013-07-04 Since 1994 the democratic government in South Africa has

worked hard at improving the lives of the black majority yet close to half the population lives in poverty jobs are scarce and the country is more unequal than ever For millions the colour of people s skin still decides their destiny In his wide ranging incisive and provocative analysis Hein Marais shows that although the legacies of apartheid and colonialism weigh heavy many of the strategic choices made since the early 1990s have compounded those handicaps Marais explains why those choices were made where they went awry and why South Africa s vaunted formations of the left old and new have failed to prevent or alter them From the real reasons behind President Jacob Zuma s rise and the purging of his predecessor Thabo Mbeki to a devastating critique of the country s continuing AIDS crisis its economic path and its approach to the rights and entitlements of citizens South Africa Pushed to the Limit presents a riveting benchmark analysis of the incomplete journey beyond apartheid

Scrambling for Africa Johanna Tayloe Crane, 2013-09-15
Countries in sub-Saharan Africa were once dismissed by Western experts as being too poor and chaotic to benefit from the antiretroviral drugs that transformed the AIDS epidemic in the United States and Europe. Today, however, the region is courted by some of the most prestigious research universities in the world as they search for resource-poor hospitals in which to base their international HIV research and global health programs. In *Scrambling for Africa*, Johanna Tayloe Crane reveals how in the space of merely a decade, Africa went from being a continent largely excluded from advancements in HIV medicine to an area of central concern and knowledge production within the increasingly popular field of global health science. Drawing on research conducted in the U.S. and Uganda during the mid-2000s, Crane provides a fascinating ethnographic account of the transnational flow of knowledge, politics, and research money, as well as blood samples, viruses, and drugs. She takes readers to underfunded Ugandan HIV clinics as well as to laboratories and conference rooms in wealthy American cities like San Francisco and Seattle, where American and Ugandan experts struggle to forge shared knowledge about the AIDS epidemic. The resulting uncomfortable mix of preventable suffering, humanitarian sentiment, and scientific ambition shows how global health research partnerships may paradoxically benefit from the very inequalities they aspire to redress. A work of outstanding interdisciplinary scholarship, *Scrambling for Africa* will be of interest to audiences in anthropology, science, and technology studies, African studies, and the medical humanities.

The State in Africa Tahir M. M. M., 2025-09-28
This book critically analyzes the complex relationship between the African state and capitalist globalization. It describes in great detail the significant effects of the various historical trajectories of global capitalist expansion on the nature and functions of the African state while focusing on the present triumph of globalized neo-liberalism on the African continent. The history of the state in Africa has been misread and misinterpreted through the Eurocentric convictions of European African scholars alike. The State in Africa has since its colonial inception served as the best possible political shell for capitalism, enabling it to penetrate again, possession, and establish itself firmly and securely regardless of institutional and leadership instability at the helm. The glaring artificiality of the state in Africa, coupled with the failure of the local ruling classes to rise above the limitations of their provenance, is to blame for the myriad crises of one-party authoritarianism, violent coups, and military dictatorship. It is also to blame for the progressive alienation of the African people and the prevailing crises of identity and citizenship. Independence does not seem to have changed much as the state is still controlled by the most powerful foreign, economically dominant class, which has appropriated political power as well to further compound the subjection and exploitation of the oppressed Africans. Today, the

continent continues to grapple with underdevelopment civil wars intra state conflicts political instability state failure and outright collapse thus calling into question the viability and survivability of the Westphalian state model in Africa

Violence in Rural South Africa, 1880-1963 Sean Redding, 2023-02-21 Violence was endemic to rural South African society from the late nineteenth century to the mid twentieth century But acts of violence were not inherent in African culture rather violence resulted from the ways in which Africans navigated the hazardous social and political landscape imposed by white rule Focusing on the Eastern Cape province Sean Redding investigates the rise of large scale lethal fights among men increasingly coercive abduction marriages violent acts resulting from domestic troubles and witchcraft accusations within families and communities and political violence against state policies and officials Many violent acts attempted to reestablish and reinforce a moral social and political order among Africans However what constituted a moral order changed as white governance became more intrusive land became scarcer and people reconstructed their notions of traditional culture State policies became obstacles around which Africans had to navigate by invoking the idea of tradition using the state s court system alleging the use of witchcraft or engaging in violent threats and acts Redding s use of multiple court cases and documents to discuss several types of violence provides a richer context for the scholarly conversation about the legitimization of violence in traditions family life and political protest

Images of Africa

Julia Gallagher,2015-05-01 Images of Africa challenges the widely held idea that Africans are powerless in the creation of self image It explores the ways in which image creation is a process of negotiation entered into by a wide range of actors within and beyond the continent in presidents offices and party HQs in newsrooms and rural authorities in rebel militia bases and in artists and writers studios Its ten chapters written by scholars working across the continent and a range of disciplines develop innovative ways of thinking about how image is produced They ask who controls image how is it manipulated and what effects do the images created have for political leaders and citizens and for Africa s relationships with the wider world The answers to these questions provide a compelling and distinctive approach to Africa s positioning in the world

establishing the dynamic relational and sometimes subversive nature of image
