

Childhood Shadows

Twisted and gnarled beyond recognition, a childhood sits faded.

No laughter, joy, or colorful sights, just a childhood shadow - a memory of constant abuse.

Blackened now from fires of amnesia, rusted from the salted water of the ocean's bottom.

Shifting sands at last uncovering their hidden faces, washing over and over their forgotten meanings.

While encountering the salty rinsing of freshly made wounds of the past's doing, hurting and burning now the heart of a once little child.

Walking away from delayed sadness, the buried anger, no chance of survival having been betrayed and abandoned.

Wellman,2014-10-09 Developmental psychologists coined the term theory of mind to describe how we understand our shifting mental states in daily life Over the past twenty years researchers have provided rich provocative data showing that from an early age children develop a sophisticated and consistent theory of mind by attributing their desires beliefs and emotions to themselves and to others Remarkably infants barely a few months old are able to attend closely to other humans two year olds can articulate the desires and feelings of others and comfort those in distress and three and four year olds can talk about thoughts abstractly and engage in lies and trickery This book provides a deeper examination of how theory of mind develops Building on his pioneering research in The Child s Theory of Mind 1990 Henry M Wellman reports on all that we have learned in the past twenty years with chapters on evolution and the brain bases of theory of mind and updated explanations of theory theory and later theoretical developments including how children conceive of extraordinary minds such as those belonging to superheroes or supernatural beings Engaging and accessibly written Wellman s work will appeal especially to scholars and students working in psychology philosophy cultural studies and social cognition Memories of Childhood John Freeman,1919 The Healing of Children:
