Shafted Christine Ahn, 2003 Nafta The WTO Trade agreements are supposed to benefit us all Instead in the decade since they ve been in effect life has become much worse for millions of ordinary Americans Hundreds of thousands of people are out of work Farmers earn less than it costs to grow their crops but consumer prices are still rising White collar jobs are following factory jobs out of the country forever Taxpayers foot the bill for the social economic and environmental wreckage And our government pushes more and more free trade as the answer to problems created by free trade In Shafted working people family farmers and farmworkers fishermen and seamstresses describe the ruin free trade has brought to them their families and their towns These aren t theorists these are the voices of experience And they re telling us clearly and eloquently that it s time to stop the madness that enriches a few companies at the cost of things so many Americans hold dear justice human rights community family and the dignity of work and of workers

Bioregionalism and Global Ethics Richard Evanoff, 2010-09-13 While a number of schools of environmental thought including social ecology ecofeminism ecological Marxism ecoanarchism and bioregionalism have attempted to link social issues to a concern for the environment environmental ethics as an academic discipline has tended to focus more narrowly on ethics related either to changes in personal values or behavior or to the various ways in which nature might be valued What is lacking is a framework in which individual social and environmental concerns can be looked at not in isolation from each other but rather in terms of their interrelationships In this book Evanoff aims to develop just such a philosophical framework one in which ethical questions related to interactions between self society and nature can be discussed across disciplines and from a variety of different perspectives The central problem his study investigates is the extent to which a dichotomized view of the relationship between nature and culture perpetuated in ongoing debates over anthropocentric vs ecocentric approaches to environmental ethics might be overcome through the adoption of a transactional perspective which offers a more dynamic and coevolutionary understanding of how humans interact with their natural environments Unlike anthropocentric approaches to environmental ethics which often privilege human concerns over ecological preservation and some ecocentric approaches which place more emphasis on preserving natural environments than on meeting human needs a transactional approach attempts to create more symbiotic and less conflictual modes of interaction between human cultures and natural environments which allow for the flourishing of both

Needless Hunger Betsy Hartmann, James K. Boyce, 1979 Why is a country with some of the world's most fertile land also the home of so many hungry people Betsy Hartmann and James Boyce both Bengali speaking anthropologists spent two years in Bangladesh investigating the paradox of hunger in a basketcase country that actually produces enough grain for its people Needless Hunger follows the history and structure of Bangladesh society and also draws us into the daily lives of the people of Katni the village where the authors lived There is no natural barrier to filling the basic human needs of Bangladesh's people they conclude But there is the man made barrier of a social order benefiting the few at the expense of the many They found that the foreign aid pouring into the country actually entrenches the very elite who keep the majority powerless and hungry Needless Hunger is also a book of hope describing the strength and potential of the Bangladesh people and their desire for a society where food producing resources are controlled by the majority Book jacket
