Los Sistemas De Educacion Superior En Los Paises Del Mercosur:

Los sistemas de educación superior en Latinoamérica Alicia Iriarte, 2021-09-08 En consonancia con el escenario global en las últimas décadas se han registrado transformaciones en los sistemas de educación superior. Se ha ido configurando un modelo de universidad más orientada al mercado y según las tendencias más recientes una educación universitaria que pasa a ser considerada como un servicio negociable, esto es como una mercancía. Estas tendencias han significado cada vez más la mercantilización de la educación superior. Esta es la razón económica que abre las puertas para la internacionalización de la educación superior. Nos encontramos ante una universidad que cada vez más internacionaliza sus instituciones y se transnacionaliza guiada por el lucro. Según el modo de las organizaciones del mundo de los negocios siguiendo la lógica de la renta. La tendencia a una educación superior transnacional implica un cambio de paradigma y la conformación de un modelo de universidad más orientado por la ganancia y el interés comercial. En consonancia con este nuevo modelo del mercado educativo global surgen nuevos elementos a ser considerados tales como el incremento y la diversidad de los diferentes tipos de proveedores, el aumento en el grupo de clientes usuarios y un nuevo rol del estado en este sector educativo. Por tanto, ante una educación superior cada vez más transnacionalizada, deberíamos incorporarse a la agenda la ponderación de temas tales como la calidad de la enseñanza impartida, la evaluación y la acreditación de títulos, contenidos y programas. La presente compilación reúne algunos artículos de nuestro grupo UBACyT de investigación que continúan los trabajos desarrollados en anteriores proyectos que han indagado sobre las transformaciones de los sistemas universitarios en América Latina en las últimas décadas y donde se ha encarado metodológicamente el análisis comparado en países de la región.

La Acreditación de la Educación Superior en Iberoamérica V. Ctor Manuel Rosario Muñoz, Victor Manuel Rosario Muñoz, 2012-10 Desde una perspectiva general la acreditación de programas educativos representa un mecanismo para orientar las tareas educativas de la formación profesional con prácticas y resultados que se reconocen desde un horizonte nacional e internacional convirtiéndose en la estrategia que han asumido las universidades e instituciones de educación superior para impulsar el mejoramiento permanente y el logro de calidad educativa. Algunas preguntas que orientan el debate sobre el tema de la acreditación de programas educativos son entre otras: ¿qué beneficios estructurales han tenido los procesos de acreditación de programas educativos en el sistema de educación superior en América Latina y España? ¿cuáles son los cambios de carácter académico que en los últimos 15 años se han generado en el sistema de educación superior en comparación con los sistemas de países con los que tenemos acuerdos bilaterales? ¿los indicadores y estándares de calidad reportados por el Consejo para la Acreditación de la Educación Superior qué significado tienen en el contexto nacional e

internacional cuyo eje es la visión de la acreditación y certificación de la educación superior en España y América Latina. En esta obra de dos volúmenes se rescatan algunas respuestas a las interrogantes planteadas mediante la recuperación de experiencias institucionales y productos de investigación sobre el tema. Finalmente se caracterizan y explican las tensiones, desencuentros, conflictos y resultados de la acreditación de la educación superior y de la gestión de la calidad de los programas educativos en la Región Iberoamericana.

La internacionalización de la educación superior. Una apuesta y una oportunidad del presente Oscar Jorge Comas Rodríguez, 2019-07-19. En México se vive desde hace décadas un pausado avance en la consolidación de sus políticas de educación superior en el ámbito internacional. El tema ha ido cobrando una importancia cada vez mayor dado el crecimiento en la demanda del nivel superior de estudios y consecuentemente la urgencia de nuevos modelos para la movilidad tanto de estudiantes como de profesores investigadores. En esta sociedad del conocimiento es indiscutible que la internacionalización representa un objetivo que debe atenderse por las Instituciones de Educación Superior IES de manera urgente, pues de lo contrario se corre el riesgo de quedar marginados del escenario global. La presente publicación reúne el análisis y la reflexión de diversos especialistas para entender las nuevas dinámicas a las que deben responder las universidades, así como las oportunidades que esta materia representa para que las IES sean reconocidas en la esfera mundial. La internacionalización de la educación superior como un proceso que va más allá de las fronteras nacionales precisa del aumento de la calidad educativa, de la creación o el fortalecimiento de redes, de la expansión de espacios de investigación, de la movilidad de estudiantes e investigadores, de una burocracia ampliamente cualificada y de homologar en la medida de lo posible los parámetros académicos que faciliten la movilidad para un aprendizaje recíproco y la generación de nuevos conocimientos que permitan a la Universidad aportar perspectivas novedosas en la construcción de soluciones a problemas sociales.

La educación Superior Transfronteriza: Un camino hacia el desarrollo de las capacidades OECD, The World Bank, 2010-02-24. La innovación evaluativa y actualización de las demandas externas vigentes es un trabajo de equipo donde los estudiantes tienen que saber qué se espera de ellos en su rol de futuro profesional. Su percepción del nivel de logro de los aprendizajes que externamente corresponden a los procesos de acreditación de la calidad académica podrá ser un marco de referencia y de satisfacción entre los propios sitios institucionales y la futura inserción en el mundo laboral.
