Los Angeles Architecture James Steele, 1998-01-22 A penetrating study of the city's fascinating and seductive architectural scene **Los Angeles Architecture** James Steele, 2004 *Los Angeles Architecture* James Steele, 1993

An Architectural Guidebook to Los Angeles Robert Winter, 2009-09 Known as the bible to Los Angeles architecture scholars and enthusiasts Robert Winter and David Gebhard's groundbreaking guide to architecture in the greater Los Angeles area is updated and revised once again From Art Deco to Beaux Arts Spanish Colonial to Mission Revival Winter discusses an impressive variety of architectural styles in this popular guide that he co-authored with the late David Gebhard New buildings and sites have been added along with all new photography Considered the most thorough L A architecture guide ever written this new edition features the best of the past and present from Charles and Henry Greene's Gamble House to Frank Gehry's Disney Philharmonic Hall This was and is again a must-have guide to a diverse and architecturally rich area Robert Winter is a recognized architectural historian who lives in Los Angeles and has led architectural tours through the Los Angeles area since 1965 He is a professor at Occidental College in Los Angeles **Literature and Race in Los**

Angeles Julian Murphet, 2001-03-19 Los Angeles is both the most fragmented and the most minoritized metropolis in America and its most luridly abstract and aestheticized city With more than eighty-five languages being spoken in its classrooms and one homogeneous visual language emanating from its entertainment industry LA radically challenges the prospects of that archaic representational medium literature In its investigation of the work of Bret Easton Ellis James Ellroy Anna Deveare Smith and others *Literature and Race in Los Angeles* articulates their aesthetic preoccupations with the structures of social space in the city Harnessing some of the theoretical insights of Henri Lefebvre and the LA school of geographers Murphet demonstrates the versatility of literary production in LA and speculates about the fortunes of literature in a predominantly visual culture **The Greenwood Encyclopedia of Homes through World History** James M.

Steele, 2009-03-30 The house throughout history in every place in the world has been built to provide shelter from the elements The dwellings that have resulted are as different as the people that have built them the social norms that prevailed at the time and place in which they were built and the natural environment that they adapted to Studying them now in a comprehensive way allows us to understand the social political economic and religious conditions that existed for their inhabitants They are a three-dimensional record of culture Twenty-four pages of color images along with black and white images through three volumes illustrate the homes of people throughout the world The volumes cover ancient times to the late Middle Ages the Renaissance to the Industrial Revolution and the Post Industrial Revolution to the Present *The Oxford Dictionary of Architecture* James Stevens Curl, Susan Wilson, 2015 With over 6 000 entries this is the most authoritative dictionary of architectural history available *Landscape and Power in Geographical Space as a Social-Aesthetic Construct* Olaf Kühne, 2018-02-13 This book examines the power definiteness of landscape from a social

constructivist perspective with a particular focus on the importance of aesthetic concepts of landscape in development. It seeks to answer the question of how societal notions of landscape emerge, how they are individually updated, and how these ideas affect the use and design of physical space. It also analyzes how physical manifestations of societal activity impact on understandings of individual and societal landscapes and addresses the essential aspect of the social construction of landscape cultural specificity, which in turn is discussed in the context of the expansion of a western landscape concept. The book offers an unprecedented comprehensive and detailed examination of societal power relations in the context of landscape development. The numerous case studies from the physical manifestation of modern spatial planning in the United States, the power discourses concerning the design of model railway landscapes, and the medial production of stereotypical landscape notions shed light on the complex and multilayered interactions of collective and individual landscape references. It is a valuable resource for geographers, sociologists, landscape architects, landscape planners, and philosophers.

Architectural Jet Lag Angie S.H., 2012-02-23. Informative, relevant, and useful. *Architectural Jet Lag* features the in-depth analysis of significant architectural concepts, definitions, and frameworks. Written by Angie S.H., this riveting book shares a concrete idea of what architecture is and what it is not. A boon to every student, professional, and even to the academic world, this compilation can be a useful source material for everyone who has the immense interest in the industry. In this book, the author perspicaciously outlines the correlation between the human body and the theological framework of architecture. This read signifies that just like jet lag, which is the circadian clock's out of synchronization with the destination time as it experiences daylight and darkness contrary to the rhythms to which it has grown accustomed, the same can go for the field of architecture; hence the term *Architectural Jet Lag*. Angie S.H. suggests that one cannot categorize architecture as a free-flowing concept such as art, interior design, creative writing, or music. Architecture follows a certain pattern that is tailor-fit to the spatial needs of individuals. Architecture as a built environment for one's daily life requires linear and concrete alignment with his paradigm. Based on the author's thesis, this study illustrates how architecture as a built environment interacts with people's ways of living by analyzing some case studies with their respective scientific methodology. Easing *Architectural Jet Lag*, this book introduces the GARCH solution when applying the Western advanced architecture to the Eastern culture and social logic of space. Groundbreaking and compelling, the authentic ideas in this exceptional read will transform readers' perception and educate them about the various considerations in the intricate world of architecture. **Pierre Koenig** Neil

Jackson, 2019-02-05. A heavily illustrated and highly designed tribute to Los Angeles architect Pierre Koenig, a key figure of the Los Angeles Modernist movement. In this remarkable and gorgeously illustrated book, Neil Jackson presents a vibrant profile of the Los Angeles architect Pierre Koenig, who *Time* magazine said lived long enough to become cool twice. From the influences of Koenig's youth in San Francisco and his military service during World War II to the Case Study Houses and his later award-laden years, Jackson's study plots the evolution of Koenig's oeuvre against the backdrop of Los Angeles, a city that

both shaped and was shaped by his architecture The book is anchored by Jackson's exciting discoveries in Koenig's archive at the Getty Research Institute Drawings photographs diaries letters lecture notes building contracts and university projects many of which are published for the first time provide an expanded understanding of Koenig and additional context for his architectural achievements An examination of Koenig's Case Study Houses shows how his often single minded and pragmatic approach to domestic architecture recognized the advantages of production housing and presciently embraced sustainable ecologically responsible design A new account of the Chemehuevi housing project in Havasu Lake California demonstrates the special role that learning and teaching played in the development of his architecture Over his fifty year career Koenig not only designed iconic houses but also directed their restoration and curated their legacy ensuring that his work could be seen and appreciated by present and future admirers of midcentury Los Angeles

The Postcolonial Condition of Architecture in Asia Francis Chia-Hui Lin, 2022-02-16 This book provides a bidirectional investigation of Asia's spatiotemporality by asking how Asia is located and how localities are Asianized Historical and theoretical inquiries into architecture and urbanism in order to trace a notional common divisor are integrated with readings of this Asian imagery Such a common divisor is conditioned to Asia's phenomenal postcolonial subjectivation and showcases Asia's unique character This book contends that the postcolonial condition of architecture in Asia suggests a potential and critical bridge to better understanding of the region Theoretically displayness is a strategic and allegoric carrier that is in the focus of this book in order to emphasize the quality of display in a broader sense of time and space Asia's architectural and urban spectacle thus is meaningfully magnified and intensified with this notion of displayness to ground the cohesive abstraction among ideological discourse production innovative theorizations and empirical phenomena in contemporary scholarship
