illustrated guide to Los Angeles's most exciting new buildings establishes the city as a mecca for forward thinking and environmentally conscious architecture. Some of the world's leading architects are making their mark on Los Angeles's cityscape with exciting and innovative projects. Fifty of the most striking buildings are profiled in this book that features every type of architecture: houses, municipal structures, art museums, office buildings, performance spaces, and houses of worship. Some of the world's leading design firms, including Diller Scofidio + Renfro, Eric Owen Moss Architects, Selldorf Architects, and wHY Architecture, have contributed to the city's structural vernacular. While the projects here are as varied as the luminous Walt Disney Concert Hall by Gehry Partners and Bestor Architecture's compact housing development named Blackbirds, each building embraces an unmistakably Californian aesthetic reimagined for a new century. With original photography, this is the first book to focus on the surge of creative building that has taken place in Los Angeles in the new millennium.

"Architecture, Design and Craft in Toronto 1900-1940" Alla Myzelev, 2017-07-05 Toronto, the largest and one of the most multicultural cities in Canada, boasts an equally interesting and diverse architectural heritage. *Architecture, Design and Craft in Toronto 1900-1940* tells a story of the significant changes in domestic life in the first 40 years of the twentieth century. Adopting a multidisciplinary approach to studies of residential spaces, the author examines how questions of modernity and modern living influenced not only architectural designs but also interior furnishings, modes of transportation, and ways to spend leisure time. The book discusses several case studies, some of which are known both locally and internationally, for example Casa Loma, while others such as Guild of All Arts or Sherwood have been virtually unstudied by historians of visual culture. The overall goal of the book is to put Toronto on the map of scholars of urban design and architecture and to uncover previously unknown histories of design, craft, and domesticity in Toronto. This study will be of interest not only to the academic community, namely architects, designers, craftspeople, and scholars of these disciplines, along with social historians, but also the general public interested in local history and/or visual culture.

California Modern Neil Jackson, 2002 In the 1950s, a series of dramatic, open, and elegant homes made him a media star, and interest in the work of his atelier has only increased over time.

Architecture and Spectacle Gevork Hartoonian, 2012 Focusing on six leading contemporary architects: Peter Eisenman, Frank Gehry, Bernard Tschumi, Zaha Hadid, Rem Koolhaas, and Steven Holl, this book puts forward a unique and insightful analysis of neo avant garde architecture. It discusses the spectacle and excess which permeates contemporary architecture in reference to the present aesthetic tendency for image making, but does so by applying the tectonic of theatricality discussed by the nineteenth-century German architect Gottfried Semper. In doing so, it breaks new ground by opening up a dialogue between the study of the past and the design of the present.

Architects who Built Southern California Antonio Gonzalez, 2019 In the early 1900s, the population of Southern California exploded, and the cities grew at such a rapid pace that builders could hardly keep up.
