Topologies of Power John Allen, 2016-01-13 *Topologies of Power* amounts to a radical departure in the way that power and space have been understood. It calls into question the very idea that power is simply extended across a given territory or network and argues that power today has a new found reach. Topological shifts have subtly altered the reach of power, enabling governments, corporations, and NGOs alike to register their presence through quieter, less brash forms of power than domination or overt control. In a world in which proximity and distance increasingly play across one another, topology offers an insight into how power remains continuous under transformation, the same but different in its ability to shape people's lives. Drawing upon a range of political, economic, and cultural illustrations, the book sets out a clear and accessible account of the topological workings of power in the contemporary moment. It will be invaluable for both students and academics in human geography, politics, sociology, and cultural studies.

Power and Space John Allen, 2024-08-05 *Power and Space* sets out the inherently spatial nature of power today and seeks to change the conversation around how power exercises us in the contemporary moment. The essays brought together in this book are a response to the fact that conventional descriptions of power and its ordered geographies no longer chime with our lived experience. Spatiality matters to the workings of power nowadays, and this book sheds light on what it is that we face when power is exercised through more subtle, spatially nuanced arrangements. It is divided into three parts, each representing a different kind of engagement with power's relationship to space: from the spatial shifts in the way power is exercised through to its assemblage, like entanglements, and in turn its progressive topological character. Throughout the book, a wide range of social, political, and economic examples are drawn upon to illustrate a more provisional sense of power, ranging for instance from the seductive logic of privatized public spaces to the attempt by a data analytics company to manipulate political behaviour through to the offshore spaces invented by rising financial elites to challenge the established banking order. Illustrating the new found abilities of the powerful to make their presence felt, this book provides an accessible account of the practical workings of power in the present day. It will be invaluable to students and academics in human geography and urban studies, as well as politics, sociology, and cultural studies.

Tourism, Power And Space Andrew Church, Tim Coles, 2007 This is the first volume to explicitly consider how leisure and tourism acts as a major focus by which power may be understood in a geographical context. Key thinking and major approaches to unravelling the complexities of power are outlined in this collection, and their relevance to current and future tourism studies is discussed. *Tourism, Power and Space* blends theoretical perspectives from leading power theorists such as Parsons, Foucault, and Clegg. Exploring the intricacies of the relationships between power, tourism, and leisure, this stimulating volume combines theoretical and

empirical writings to illustrate the extent to which power in its various forms and guises and at various scales of operation impacts on the unfolding structures practices and organization of tourism and leisure on both the demand and supply sides Divided into three sections Power Performance And Practice Power Property And Resources and Power Governance And Empowerment this text will be a useful resource for students and academics alike **International Encyclopedia of**

permanent appropriation of physical space and through discursive strategies The continuity of the power relations in the cities of Holland spanning centuries makes it urgent to look not only at the assumption of urban space as an expression of power relations within society but also at the contribution of this appropriation to the acceptance and continuity of the existing power relations in pre modern Holland Within this broad area extensive attention is paid to the very prominent and enduring appropriation of urban space in the field of housing the less permanent but violent appropriation of urban space during the public execution of scaffold punishments the maintenance of public order by civic militias and appropriation during riots and revolts In addition city descriptions maps and pictures of the pre modern cities of Holland are scrutinised for what they can reveal about the appropriation of urban spaces These themes each have an extensive historiography but they have never been brought together in an interpretative framework that fits in with Pierre Bourdieu's model of society and the work of especially John Allen on power until now

Politics and Power in the Multinational Corporation Christoph Dörrenbächer, Mike Geppert, 2011-04-14 This book was first published in 2011 The current financial and economic crisis has negatively underlined the vital role of multinational companies MNCs

in our daily lives The breakdown and crisis of flagship MNCs such as Enron WorldCom Lehman Brothers Toyota and General Motors does not merely reveal the problems of corporate malfeasance and market dysfunction It also raises important questions both for the public and the academic community about the use and misuse of power by MNCs in the wider society as well as the exercise of power by key actors within internationally operating firms This book examines how issues of power and politics affect MNCs at three different levels the macro level the meso level and the micro level This wide ranging analysis shows not only that power matters but also how and why it matters pointing to the political interactions of key power holders and actors within the MNC both managers and employees **Globalization and Sovereignty** John

Agnew,2009-03-16 This provocative and important text offers a new way of thinking about sovereignty both past and present Distinguished geographer John Agnew boldly challenges the widely popular story that state sovereignty is in worldwide eclipse in the face of the overwhelming processes of globalization He argues that this perception relies on ideas about sovereignty and globalization that are both overstated and misleading Agnew contends that sovereignty state control and authority over space is not necessarily neatly contained in state by state territories nor has it ever been so Yet the dominant image of globalization is the replacement of a territorialized world by one of networks and flows that know no borders other than those that define the Earth itself In challenging this image Agnew first traces the ways in which it has become commonplace He then develops a new way of thinking about the geography of effective sovereignty and the various geographical forms in which sovereignty actually operates in the world offering an exciting intellectual framework that breaks with the either or thinking of state sovereignty versus globalization **Post-structuralist Geography** Jonathan

Murdoch,2006 An introduction to post structuralist theory that critically assesses how the concept can be used to study space and place this text communicates a new agenda for the study of human geography **Respatialising Finance** Sarah Hall,2021-04-19 RESPATIALISING FINANCE In Respatialising Finance Sarah Hall uses the internationalisation of the Chinese Renminbi RMB to work through a sympathetic conceptual and empirical critique of prevailing analyses of International Financial Centres IFCs Her conceptual re framing stresses the politics institutions and economics of IFCs and will be essential reading for all social scientists interested in the dynamism of contemporary finance and financial centres Professor Jane Pollard Centre for Urban and Regional Development Studies CURDS Newcastle University UK Through detailed study of Chinese RMB internationalisation and combining analytical insights from economic geography sociology and international political economy Sarah Hall shows why offshore networks anchored in territories such as the City of London are both core to global monetary and financial landscapes and provide a key terrain for state power and politics Professor Paul Langley Department of Geography Durham University UK Respatialising Finance is one of the first detailed empirical studies of how and why London became the leading western financial centre within the wider Chinese economic and political project of internationalising its currency the renminbi RMB This in depth volume examines how political

authorities in both London and Beijing identified the potential value of London's international financial centre in facilitating and legitimising RMB internationalisation and how they sought to operationalise this potential through a range of market making activities. The text features original data from on the ground research in London and Beijing conducted with financial and legal professionals working in RMB markets and offers an original theoretical approach that brings economic geography into closer dialogue with international political economy. Recent work on territory illustrates how financial centres are not simply containers and facilitators of global financial flows rather they serve as territorial fixes within the dynamic and crisis prone nature of global finance.
