Lost Science:

Lost Science Gerry Vassilatos, 1997 Gerry Vassilatos writes about the remarkable lives astounding discoveries incredible inventions of such famous people as Nikola Tesla Dr Royal Rife T T Brown T Henry Moray Read about the aura research of Baron Karl von Reichenbach the wireless of Antonio Meucci the controlled fusion devices of Philo Farnsworth the earth battery of Nathan Stubblefield more What were the twisted intrigues that surrounded the often deliberate attempts to stop this technology Vassilatos claims that we are living hundreds of years behind our intended level of technology that we must recapture this lost science Rediscover the legendary names of our suppressed scientific revolution read about the remarkable lives astounding discoveries incredible inventions that would have produced a world of wonder How did the aura research of Baron Karl von Reichenbach prove the vitalistic theory frighten the greatest minds in Germany How did the physiophone wireless of Antonio Meucci predate both Bell Marconi by decades How does the earth battery technology of Nathan Stubblefield portend an unsuspected energy revolution How did the geoaetheric engines of Nikola Tesla threaten the establishment of a fuel dependent America The microscopes virus destroying ray machines of Dr Royal Rife provided the solution for every world threatening disease Why did the FDA AMA together condemn this great man to a federal prison The static crashes on telephone lines enabled Dr Henry T Moray to discover the reality of radiant space energy Was the mysterious Swedish stone the powerful mineral Dr Moray discovered the very first historical instance in which stellar power was recognized secured on earth Why did the Air Force initially fund the gravitational warp research warp cloaking devices of T Townsend Brown then reject them When the controlled fusion devices of Philo Farnsworth achieved the break even point in 1967 why was the FUSOR project abruptly canceled by ITT What were the twisted intrigues that surrounded these deliberate convolutions of history Each chapter is a biographic treasure Huna, a Secret Science At Work - The Huna Method As a Way of Life Max Freedom Long, 2015-01-09 The word kanuna is an ancient term and is in use today It is pronounced kah hoo nah and meant keeper of the secret The word for their secret lore was never found The role of secrecy had been so strong and so well kept that it may never have been given a name The name we used for this reason was Huna pronounced hoo nah which means secret Enough basic information will be incorporated in this book to give a working picture of the system of beliefs and practices upon which experimental work has been based Interspersed with the instructions will be found explanations of the sources of conclusions of symbols words and word roots familiar to Huna but which we also found in other religions mainly Christianity These will tend to show that the meanings ascribed to Huna are well founded Huna is compatible with other systems It interferes with none of them but makes possible a greater understanding of the old truths From the Introduction Get Your Copy Today The Essential Science Fiction Television Reader J.P. Telotte, 2008-05-02 A richly detailed and critically penetrating overview from the plucky adventures of Captain Video to the postmodern paradoxes of The X Files and Lost Rob Latham coeditor of Science Fiction Studies Exploring such hits as The

Twilight Zone Star Trek Battlestar Galactica and Lost among others The Essential Science Fiction Television Reader illuminates the history narrative approaches and themes of the genre The book discusses science fiction television from its early years when shows attempted to recreate the allure of science fiction cinema to its current status as a sophisticated genre with a popularity all its own J P Telotte has assembled a wide ranging volume rich in theoretical scholarship yet fully accessible to science fiction fans The book supplies readers with valuable historical context analyses of essential science fiction series and an understanding of the key issues in science fiction television Lost's Buried Treasures Lynnette R. The Year's Best Science Fiction Gardner R. Dozois, 1994 A collection of the best stories published in 1994 Climate Change and the Future of Democracy R. S. Deese, 2018-09-10 This book will survey past and present efforts to democratize international institutions and will advance the argument that a new degree of transparency and accountability on a global scale is necessary to address the threat of climate change The volume will analyse how global governance could become more democratic and consequently more responsive to the challenge of climate change As economic globalization has accelerated since 1945 international institutions have done a remarkable job in facilitating global communication and commerce but have been far less effective in protecting the global commons **Departments of Veterans Affairs and** Housing and Urban Development, and Independent Agencies Appropriations for 1996: National Aeronautics and Space Administration United States. organizations as they move to new ways to teach science The Legends of the Pyramids Jason Colavito, 2021-08-03 In the vein of the Prothero titles which have sold well Well researched book which traces the origins of popular myths surrounding the pyramids It examines Egypt from the point of view of pop culture and myth rather than academic history It is one of the first books to fully explore the influence of medieval Islam on modern myths of Egypt It connects stories from Classical Antiquity down to modern movies to show they are part of a continuous whole It includes discussion and translation of rare ancient and medieval texts almost never discussed in the West Hitler the Scientist Andrew Pike, 2024-11-30 Hitler s flawed education and anti Semitism distorted Germany's scientific advancements leading to the rise of pseudo science and the decline of true scientific inquiry during the Third Reich When Hitler came to power in 1933 he promised the German people a technocratic state where science technology and education would grow and flourish Unfortunately any attempts to achieve such a goal were dependent on his educational background which was fundamentally flawed and severely distorted Hitler's schooling was a troubled time where he struggled with many subjects In particular he found conflicting views between science and religion so difficult to understand it caused him to run his head against the wall He was also heavily educated in subjects like myths magic pseudo sciences and the occult which would become his versions of alternative science and alternative facts These alternatives remained with him into adulthood where as Fuhrer his mentality and mindset towards science was highlighted when he announced A new age of magic interpretation of the world is coming of interpretation in terms of the will and not the intelligence Hitler's ideology and rise to power also came at an interesting time for physics which was hinting at that will not intelligence interpretation The early decades of the twentieth century had seen a revolution in two apparently connected key areas of the subject known as quantum mechanics and relativity these would have a dramatic influence on Hitler and the physics of the Third Reich During the 1920s quantum mechanics was suggesting that just by observing an experiment a scientist could alter the outcome and reality However at the same time Albert Einstein s theory of relativity was also developing and whereas the two areas were believed to be linked to the Nazis there was a serious problem Whereas German physicist Max Planck's quantum physics was a non Jewish science hinting at that promised magical underlying foundation to physics and reality Einstein was Jewish and so was his theory Moreover relativity was difficult to understand and accept especially amongst certain right wing experimental physicists Therefore relativity was easy to reject with the magical quantum world eagerly accepted by the Nazis However with Hitler's ability to understand science clearly strained and steadfast from childhood together with his seething anti Semitism this decision set the Nazis on a research road very different from the Allies As the decade progressed so did the ridicules towards Jewish science through Einstein and his theory This set in motion extreme anti Semitic attacks on him by those extreme right wing experimental physicists many of whom would later find key roles in Hitler's government As such the theoretical physics dominated by Jewish scientists was rejected en mass with key Jewish scientists dismissed from their academic posts Instead the Third

Reich favoured experimental or applied physics which shaped much of Hitler's war machine with the so called magical interpretation of quantum mechanics and its apparent will over intelligence providing the basis for unconventional pseudo scientific research research like free energy anti gravity and hidden occultist physics through ancient texts Through Hitler's key reforms in science and education and Heinrich Himmler's SS science became politicised with an added danger that certain areas were replaced with Nazi alternatives like pseudo science magic and the occult The result was certain areas of true sciences became pseudo sciences while the Third Reich s pseudo sciences became the true sciences Disciplines then became Aryan physics Aryan chemistry Aryan biology Aryan mathematics and so on with all expected to prove their place within National Socialism or perish From there science experienced an era of division and decline with loss of freedom and diversity misapplication of innovation and the inevitable decline in some areas of the natural sciences especially physics and mathematics By the war s end Himmler s SS had taken control of much of Nazi Germany s scientific research and with the unthinkable dawning on the Nazis that they might lose the war Hitler placed SS General Hans Kammler in charge of producing new and unconventional wonder weapons even super weapons through his own think tank along the lines as Himmler's Ahnenerbe Hitler's faith in Kammler meant he was promoted to only one rank below Himmler working with him in an intense effort to turn the war around especially following the D Day landings To the very end Hitler continued to declare these super weapons would save Nazi Germany but this led to intolerable strain on his generals when Hitler ordered troops to make last ditch attempts to protect certain locations locations his generals did not fully understand and made no tactical sense as the Allies advanced on Berlin Once again Hitler had failed to understand the true situation while Kammler and Himmler had their own plans in place It is clear the foundations of Hitler's education and its support by like minded Nazis set in place a destiny that helped the downfall of the Third Reich Consequently over time the promised veneer of scientific and educational modernisation under his technocratic state suffered seriously and although this did not initially cause his government to collapse it neither allowed it to thrive anywhere close to the many promises he made to the German people All this was a far cry from Germany's scientific research of the nineteenth century which saw staggering achievements up to Hitler's rise to power These golden years built an unrivalled global reputation from the foundations of chemistry expanding into other scientific disciplines like physics and astronomy In doing so Germany's economy flourished and by the early twentieth century over half of the Nobel Prizes were won by German scientists or German speaking scientists many of whom were Jews Although Hitler spoke of the golden years and promised to build upon them it was yet another broken promise based on his lack of scientific understanding and how science needed to do its job With fleeing Jewish scientists and failures under a dictator focused on pseudo science and seething anti Semitism the Allies took full advantage of the destiny Hitler had Why I Am Not a Scientist Jonathan Marks, 2009-06-23 Highly readable and informative this critical created for himself series of vignettes illustrates a long history of the corruption of science by folk beliefs careerism and sociopolitical agendas

Marks repeatedly brings home the message that we should challenge scientists especially molecular geneticists before we accept their results and give millions of dollars in public and private funds toward their enterprises Russell Tuttle The University of Chicago Jonathan Marks has produced a personal and compelling story of how science works His involvement in scientific endeavor in human biology and evolution over the past three decades and his keen sense of the workings of science make this book a must read for both scientists and lay readers In this sense the lay reader will learn how scientists should and shouldn t think and some scientists who read this book will come away thinking they are truly not scientists nor would they want to be Rob DeSalle American Museum of Natural History Jonathan Marks s Why I Am Not a Scientist provides food for thought and as expected it s digestible In unusually broad perspective this anthropology of knowledge considers science and race and racism gender fraud misconduct and creationism in a way that makes one proud to be called a scientist George J Armelagos Emory University **Making Sport History** Pascal Delheye, 2014-05-23 The field of sport history is a relatively new research domain situated at the intersection of a number of disciplines and sub disciplines This interdisciplinarity has created interesting avenues for growth and fresh thinking but also inherent problems of coherence and identity Making Sport History examines the development of an academic community around sport history exploring the roots of the discipline its current boundaries borders and challenges and looking ahead at future prospects Written by a team of world leading sport historians with commentaries from scholars working outside of the sport historical mainstream the book considers key themes in the historiography of sport including The relationship between history sport studies and physical education Comparative analysis of the role of historians in the writing of sport history Modern and post modern approaches to sport history Race gender and the sport historical establishment The role of scholarly organisations conferences and journals in discipline building Presenting new perspectives on what constitutes sport history and its core methodologies the book helps explain why historians have become interested in sport why they ve chosen the topics they have and how their work has influenced the wider world of history and been influenced by it Making Sport History is essential reading for any advanced student scholar or researcher with an interest in sport history historiography or the history and philosophy of the social Positivist Republic Gillis J.
