Contesting Earth's History in Transatlantic Literary Culture, 1860-1935 Richard Fallon, 2025-02-14 By the mid nineteenth century geologists and palaeontologists had reconstructed an authoritative narrative of Earth s deep history from the planet s molten origins to the rise of humanity Many figures in transatlantic science across subsequent decades however had problems with this narrative it was too secular inhuman and evolutionary or controlled too exclusively by elite scientists Speaking from palaeoscience s unevenly professionalized and controversy racked borders Christian fundamentalists charismatic psychics and respected scholars alike voiced their objections Until now no study has brought their work together for detailed comparative analysis Spanning from the 1860s to the interwar decades *Contesting Earth's History* examines the fascinating stories of five significant examples of fringe or borderline palaeoscience old and young earth creationism hollow earth theory clairvoyant time travel and sunken continent catastrophism Innovatively combining methods from literary studies with the history of science this book attends

not just to the conceptual content of these strange sciences but also to their proponents communication of truth claims through diverse genres ranging from the scientific textbook and the technical monograph to the lost world romance and the epic poem By paying close attention to the hitherto overlooked textual forms and literary strategies of these works of pseudoscience this volume throws into relief the variant conceptions of audience evidence and method that jostled and competed in wider scientific culture during this period It also demonstrates that for all their diversity authors of borderline palaeoscience shared the desire to shift the balance of power creating textual spaces where exclusive hierarchies of scientific expertise could be levelled away These conjurors of lost worlds often captivated wide audiences and many of their bizarre astonishing and iconoclastic ideas remain with us to this day Some even inspired early science fiction by the likes of H P Lovecraft and Edgar Rice Burroughs Hijacking geologists and palaeontologists longstanding effort at making the prehistoric past visible authors on the borderlines of palaeoscience asserted their right to scientific authority and encouraged readers to gaze into time s abyss with bold new eyes The World's Oceans Rainer F. Buschmann,Lance Nolde,2025-01-23 Discover the science cultural history and environmental importance of our planet s oceans The second edition of this award winning encyclopedia has been updated throughout and includes more than 20 additional entries and highlights timely concerns including overfishing and microplastics while also providing expanded coverage of the role oceans play in modern society from cruise ships to the America s Cup competition Part I of the book features a collection of 10 thematic essays covering the five oceans of the world and broad areas of study such as the shipping industry and the changing nature of ocean boundaries Part II includes more than 115 encyclopedia entries exploring topics ranging from the Bermuda Triangle to maritime law from tsunamis to ocean acidification Sidebars throughout offer fascinating facts that complement the main text The oceans of the world are the lifeblood of our planet They act as a climate regulator absorbing heat and influencing weather patterns The oceans teem with a vast and mostly unexplored diversity of life providing us with food and medicine Historically oceans have been the highways of exploration and trade connecting continents and fostering cultural exchange From ancient Polynesian voyagers to modern shipping lanes societies have relied on the oceans for transportation and resources Yet despite their vastness and importance the world s oceans face numerous threats including the effects of climate change pollution and exploitation of their bounty As If Michael Saler,2012-01-09 Many people throughout the world inhabit imaginary worlds communally and persistently parsing Harry Potter and exploring online universes These activities might seem irresponsibly escapist but history tells another story Beginning in the late nineteenth century when Sherlock Holmes became the world s first virtual reality character readers began to colonize imaginary worlds debating serious issues and viewing reality in provisional as if terms rather than through essentialist just so perspectives From Lovecraft s Cthulhu Mythos and Tolkien s Middle earth to the World of Warcraft and Second Life As If provides a cultural history that reveals how we can remain enchanted but not deluded in an age where fantasy and reality increasingly intertwine **Vintage Visions** Arthur B.

Evans, 2014-06-11 *Vintage Visions* is a seminal collection of scholarly essays on early works of science fiction and its antecedents. From Cyrano de Bergerac in 1657 to Olaf Stapledon in 1937, this anthology focuses on an unusually broad range of authors and works in the genre as it emerged across the globe, including the United States, Russia, Europe, and Latin America. The book includes material that will be of interest to both scholars and fans, including an extensive bibliography of criticism on early science fiction, the first of its kind, and a chronological listing of 150 key early works. Before *Dr. Strangelove*, future war fiction was hugely popular in nineteenth-century Great Britain. Before *Terminator*, a French author depicted Thomas Edison as the creator of the perfect female android. These works and others are featured in this critical anthology. Contributors include Paul K. Alkon, Andrea Bell, Josh Bernatchez, I. F. Clarke, William J. Fanning Jr., William B. Fischer, Allison de Fren, Susan Gubar, Rachel Haywood, Ferreira Kamila Kinyon, Stanislaw Lem, Patrick A. McCarthy, Sylvie Romanowski, Nicholas Ruddick, and Gary Westfahl. Hardcover, unjacketed.
