Restoring North America's Birds Robert A. Askins,2008-10-01 DIVThe decline of bird species in a wide range of North American habitats forests prairies shrublands mountain regions marshes and deserts has inspired two decades of intense scientific study of bird ecology and conservation But for professional scientists and amateur birders alike interpreting the results of these diverse studies is often complex and bewildering This accessible book pulls together recent research on bird species and habitats to show how basic ecological principles apply in seemingly different situations Robert A Askins provides an engaging introduction to bird ecology and concepts of landscape ecology focusing on such intriguing species as Bachman's Warbler Red Crossbill Mountain Plover and Marbled Murrelet Understanding the ancient landscapes of North America and how humans have changed them Askins says is essential for devising plans to protect and restore bird populations In addition to such obvious changes to the landscape as the clearing of forests and plowing of prairies more subtle changes also dramatically affect birds Species may disappear when we interrupt natural disturbances by suppressing wildfires or trapping out beaver or when we disrupt habitat with roads and housing developments Askins challenges some of the assumptions that underlie current conservation efforts and offers concrete recommendations based on sound ecological principles for protecting the rich natural diversity of North America's birds div The Condor ,1919 *Bulletin of the Cooper Ornithological Club of California* ,1918 *Gulls of Europe, Asia and North America* Klaus Malling Olsen,2010-06-30 This eagerly awaited guide offers the most comprehensive treatment ever published on the gulls of Europe Asia and North America A total of 43 species is treated and every species is described in considerable detail with a full description of each plumage and racial variation Gulls are intelligent versatile opportunistic and ecological generalists As such they exploit a variety of habitats both coastal and inland take a wide range of food and are often extremely abundant They are also great wanderers with several American species regularly appearing in Western Europe and vice versa As well as identification criteria this book includes an up to date assessment of the range and status of every species together with information on patterns of vagrancy This important guide is published at a critical time in the development of dull taxonomy The large white headed forms occurring in the region comprise a superspecies complex with the precise relationships between the various components still under considerable debate A thorough illustrative and textual treatment of the group is much needed and this book provided the most complete overview of the complex The text is complemented not only by superb colour paintings by Hans Larrson but also by a large selection of colour photographs sourced from some of the finest bird photographers in the world This is the essential reference to a fascinating and endlessly challenging group of birds *American Pigeon*
