Rape and Representation Lynn A. Higgins, 1993-07-15 Rape does not have to happen The fact that it does and in the United States a rape is reported every six minutes indicates that we live in a rape prone culture where rape or the threat of rape functions as a tool for enforcing sexual difference and hierarchy Rape and Representation explores how cultural forms construct and reenforce social attitudes and behaviors that perpetuate sexual violence The essays proceed from the observation that literature not only reflects but also contributes to what a society believes about itself Fourteen essays by authors in the fields of English American and African American German African Brazilian Classical and French literatures and film present a wide range of texts from different historical periods and cultures Contributors demythologize patriarchal representation in literature and art in order to show how it makes rape seem natural and inevitable Contributors include the editors John J Winkler Patricia Klindiest Joplin Susan Winnett Ellen Rooney Copp lia Kahn Eileen Julien Marta Peixoto Kathryn Gravdal Carla Freccero Nellie V McKay Nancy A Jones and Froma I Zeitlin Their work raises pressing and often difficult questions for feminist criticism

The New Foundations of Evolution Jan Sapp,2009-07-24 This is the story of a profound revolution in the way biologists explore life s history understand its evolutionary processes and reveal its diversity It is about life s smallest entities deepest diversity and greatest cellular biomass the microbiosphere Jan Sapp introduces us to a new field of evolutionary biology and a new brand of molecular evolutionists who descend to the foundations of evolution on Earth to explore the origins of the genetic system and the primary life forms from which all others have emerged In so doing he examines from Lamarck to the present the means of pursuing the evolution of complexity and of depicting the greatest differences among organisms The New Foundations of Evolution takes us into a world that classical evolutionists could never have imagined a deep phylogeny based on three domains of life and multiple kingdoms and created by mechanisms very unlike those considered by Darwin and his followers Evolution by leaps seems to occur regularly in the microbial world where molecular evolutionists have shown the inheritance of acquired genes and genomes are major modes of evolutionary innovation Revisiting the history of microbiology for the first time from the perspective of evolutionary biology Sapp shows why classical Darwinian conceptions centering on questions of the origin of species were forged without a microbial foundation why classical microbiologists considered it impossible to know the course of evolution and classical molecular biologists considered the evolution of the molecular genetic system to be beyond understanding In telling this stirring story of scientific iconoclasm this book elucidates how the new evolutionary biology arose what methods and assumptions underpin it and the

fiery controversies that continue to shape biologists understanding of the foundations of evolution today *The Alexiad*

Clegg,2015-01-30 This title covers the entire syllabus for Cambridge International Examinations International AS and A Level Biology 9700 It is divided into separate sections for AS and A Level making it ideal for students studying both the AS and the A Level and also those taking the AS examinations at the end of their first year Explains difficult concepts using language that is appropriate

for students around the world Provides practice throughout the course with carefully selected past paper questions at the end of each chapter We are working with Cambridge International Examinations to gain endorsement for this title *Keats and Hellenism* Martin Aske, 2005-01-27 This book proposes a fresh and original interpretation of Keats use of classical mythology in his verse Dr Aske argues that classical antiquity appears to Keats as a supreme fiction authoritative yet disconcerting and his poems represent hard endeavours to come to terms with the influence of that fiction The major poems most notably *Endymion* *Hyperion* the *Ode on a Grecian Urn* and *Lamia* form a stage as it were upon which is played out a psychic drama between the modern poet and his classical muse The study is especially bold in its assimilation of historical scholarship and literary theory to a close reading of the texts Individual poems are discussed in the context of late Enlightenment and Romantic attitudes towards antiquity and in the light of recent critical theory in particular the theory of literary history and influence formulated by Harold Bloom and Geoffrey Hartman Keats emerges as a significant example of the way in which a poet tries to establish a distinct identity under the burden of history and of literary tradition
