Memories Of A Galloway Childhood:

Memories of a Galloway Childhood Christopher Russell, 1989 *Contesting Childhood* Kate Douglas, 2010-01-21 The late 1990s and early 2000s witnessed a surge in the publication and popularity of autobiographical writings about childhood Linking literary and cultural studies *Contesting Childhood* draws on a varied selection of works from a diverse range of authors from first time to experienced writers Kate Douglas explores Australian accounts of the Stolen Generation contemporary American and British narratives of abuse the bestselling memoirs of Andrea Ashworth Augusten Burroughs Robert Drewe Mary Karr Frank McCourt Dave Pelzer and Lorna Sage among many others Drawing on trauma and memory studies and theories of authorship and readership *Contesting Childhood* offers commentary on the triumphs trials and tribulations that have shaped this genre Douglas examines the content of the narratives and the limits of their representations as well as some of the ways in which autobiographies of youth have become politically important and influential This study enables readers to discover how stories configure childhood within cultural memory and the public sphere

Have You Seen My... Umm... Memory? Miller Caldwell, 2009 Everyone has had the frustrating experience of putting something down and then forgetting where Although there are many factors that contribute to the ability to remember it is also a simple fact that some people are better at remembering than others Outside influences like stress hormone problems or even the side effects of medications can make people absentminded and forgetful But what if your memory is simply getting progressively worse Are you frequently embarrassed at not being able to remember someone's name Have you ever driven away from a petrol station and genuinely forgotten to pay Are these episodes of memory loss driving you to despair If so then this book by Miller Caldwell is not only going to amuse and entertain you but it will provide you with many serious tips and selfhelp exercises that will help you train your brain all over again Mr Caldwell begins by explaining his own diagnosed condition called mild cognitive impairment MCI and the frustration he felt at having to retire early because of shortterm memory loss He explains in simple terms how the human brain processes our thoughts and then stores them in preparation for recall He explains how in most people sharp thinking and reasoning skills are unaffected by shortterm memory decline and suggests that if an older person learns information in the right way he or she is just as likely to remember it as a younger counterpart Each helpful tip and suggested exercise comes with an anecdote from Caldwell's many varied and fascinating life experiences including how he almost married the wrong woman Presented in a delightful and straightforward format this book will be an invaluable companion to those of us who are just a little bit forgetful or equally to those in the early stages of dementia Oh and just in case you forget the charming cover illustration of an elephant with a knot in its trunk will remind you to pick up a copy of your own

The Fiction of Autobiography Micaela Maftai, 2013-07-04 Writing autobiography is a complicated often fraught activity for both writer and reader We can find many recent examples of the way such writing calls into question the author's truthfulness or their authority to present as

definitive their version of a particular event or portion of their lives Drawing upon a wide range of late twentieth and early twenty first century autobiographical writing *The Fiction of Autobiography* examines key aspects of autobiography from the interrelated perspectives of author reader critic and scholar to reconsider how we view this form of writing and its relationship to the way we understand and construct identity Maftai considers recent cases and texts such as Didion's *The Year of Magical Thinking* and Frey's *A Million Little Pieces* alongside older texts such as Proust's *In Search of Lost Time* Nabokov's *Invitation of a Memory* and Stein's *The Autobiography of Alice B Toklas* In part this is to emphasise that key issues reappear and arise over decades and centuries and that texts distanced by time can speak to each other thoughtfully and poignantly

Development of Long-Term Retention Mark L. Howe, Charles J. Brainerd, Valerie F. Reyna, 2012-12-06 For a number of decades now the study of children's memory development with few exceptions has been synonymous with the development of processes that lead to the initial encoding and immediate retention of information Although there is little doubt that the study of such acquisition processes is central to understanding memory development the long term retention of previously encoded information represents at least as important a component of children's memory Indeed as both students of memory development and educators our interest is in the maintenance and utilization of knowledge over considerable periods of time not just in the immediate e.g. classroom context Clearly then without an understanding of how recently acquired information is maintained in memory over extended periods of time our theories of long term memory development remain incomplete at best Although children's forgetting and reminiscence was a topic of inquiry early in this century it is only recently due in part to the current controversy concerning the reliability of children's eyewitness testimony that the study of long term retention has resurfaced in the scientific literature The purpose of this volume is to draw together some of the principals involved in this resurgence to summarize their recent research programs present new and previously unpublished findings from their labs and outline the issues they believe are important in the study of children's long term retention
