Seligmann,Kathleen S. Fine-Dare,2018-11-08 This comprehensive reference offers an authoritative overview of Andean lifeways It provides valuable historical context and demonstrates the relevance of learning about the Andes in light of contemporary events and debates The volume covers the ecology and pre Columbian history of the region and addresses key themes such as cosmology aesthetics gender and household relations modes of economic production exchange and consumption postcolonial legacies identities political organization and movements and transnational interconnections With over 40 essays by expert contributors that highlight the breadth and depth of Andean worlds this is an essential resource for students and scholars alike *Sex and Suffrage in Britain, 1860-1914* Susan Kingsley Kent,2014-07-14 Although other historians have viewed the suffrage movement as aimed at exclusively political ends she argues that such a categorization ignores many of the most compelling reasons why

thousands of middle and upper class women risked ostracism obloquy and often physical harm in the pursuit of the right to vote and why their efforts met with such intense opposition The alliance of respectable middle class women with prostitutes the attack on marriage and the suffragists distrust of the medical profession are among the topics the author addresses Drawing on hypotheses advanced by Michel Foucault she asserts that feminists sought no less than the total transformation of the lives of women Originally published in 1987 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Political Ecology Across Spaces, Scales, and Social Groups Susan Paulson, Lisa L. Gezon, 2005 Environmental issues have become increasingly prominent in local struggles national debates and international policies In response scholars are paying more attention to conventional politics and to more broadly defined relations of power and difference in the interactions between human groups and their biophysical environments Such issues are at the heart of the relatively new interdisciplinary field of political ecology forged at the intersection of political economy and cultural ecology This volume provides a toolkit of vital concepts and a set of research models and analytic frameworks for researchers at all levels The two opening chapters trace rich traditions of thought and practice that inform current approaches to political ecology They point to the entangled relationship between humans politics economies and environments at the dawn of the twenty first century and address challenges that scholars face in navigating the blurring boundaries among relevant fields of enquiry The twelve case studies that follow demonstrate ways that culture and politics serve to mediate human environmental relationships in specific ecological and geographical contexts Taken together they describe uses of and conflicts over resources including land water soil trees biodiversity money knowledge and information they exemplify wide ranging ecological settings including deserts coasts rainforests high mountains and modern cities and they explore sites located around the world from Canada to Tonga and cyberspace

in different parts of the world and to use them as the basis for considering what we could learn from one another and what we could do together Today inter hemispheric intercultural and transdisciplinary collaborations for Earth Stewardship are an imperative Chapters document pathways that are being forged by socio ecological research networks religious alliances policy actions environmental citizenship and participation and new forms of conservation based on both traditional and contemporary ecological knowledge and values The Earth Stewardship Initiative of the Ecological Society of America fosters practices to provide a stable basis for civilization in the future Biocultural ethic emphasizes that we are co inhabitants in the natural world no matter how complex our inventions may become Peter Raven **SIDA, Contributions to Botany** ,2000

Sex and Violence Penelope Harvey,Peter Gow,2013-12-02 First published in 1994 Routledge is an imprint of Taylor Francis an informa company *A Culture of Stone* Carolyn Dean,2010-10-21 A major contribution to both art history and Latin American studies A Culture of Stone offers sophisticated new insights into Inka culture and the interpretation of non Western art Carolyn Dean focuses on rock outcrops masterfully integrated into Inka architecture exquisitely worked masonry and freestanding sacred rocks explaining how certain stones took on lives of their own and played a vital role in the unfolding of Inka history Examining the multiple uses of stone she argues that the Inka understood building in stone as a way of ordering the chaos of unordered nature converting untamed spaces into domesticated places and laying claim to new territories Dean contends that understanding what the rocks signified requires seeing them as the Inka saw them as potentially animate sentient and sacred Through careful analysis of Inka stonework colonial period accounts of the Inka and contemporary ethnographic and folkloric studies of indigenous Andean culture Dean reconstructs the relationships between stonework and other aspects of Inka life including imperial expansion worship and agriculture She also scrutinizes meanings imposed on Inka stone by the colonial Spanish and later by tourism and the tourist industry A Culture of Stone is a compelling multidisciplinary argument for rethinking how we see and comprehend the Inka past **Environmental Infrastructure in African History** Emmanuel Kreike,2013-05-13 Environmental Infrastructure in African History offers a new approach for analyzing and narrating environmental change Environmental change conventionally is understood as occurring in a linear fashion moving from a state of more nature to a state of less nature and more culture In this model non Western and pre modern societies live off natural resources whereas more modern societies rely on artifact or nature that is transformed and domesticated through science and technology into culture In contrast Emmanuel Kreike argues that both non Western and pre modern societies inhabit a dynamic middle ground between nature and culture He asserts that humans in collaboration with plants animals and other animate and inanimate forces create environmental infrastructure that constantly is remade and re imagined in the face of ongoing processes of change **The Human Mosaic** Mona Domosh,Terry G. Jordan-Bychkov,Roderick P. Neumann,Patricia L. Price,2012
