Nature Series Mozu The Snow Monkey:

Wildlife Films Derek Bousé, 2011-11-29 If as many argue movies and television have become Western culture's premier storytelling media so too have they become for most members of society the primary source of encounters with the natural world particularly wild animals The television fare offered nightly by national and cable networks such as PBS and the Discovery Channel provides millions of viewers with their only experience of the wilderness and its inhabitants The very films that so many viewers take as accurate portrayals of wildlife however have evolved primarily as a form of entertainment following the established codes and conventions of narrative exposition The result has been not the representation of nature but its wholesale reconstruction and reconfiguration according to film and television conventions audience expectations and the demands of competition in the media marketplace *Wildlife Films* traces the genealogy of the nature film from its origins as the animal locomotion studies that mark the very beginnings of motion pictures themselves to the founding of the Animal Planet cable channel that boasts all animals all the time The narrative and thematic elements that unite wildlife films as a genre have their roots not in the documentary film tradition but in the older traditions of oral and written animal fables as reflections of human society Derek Bousé contends that classic wildlife films often portray animal protagonists living in families modeled on an ideal of the human nuclear family and working in communities that resemble an ideal of bucolic human society In these stories presented as documentaries animals are motivated by human emotions and conduct relationships according to human customs This imposition of culturally satisfying narrative patterns upon the lives of animals has not only led to the misrepresentation of the natural world it has promoted the notion that our values our moral vision our models of society and family structure derive from nature rather than being cultural formations New York Magazine, 1989-11-27 *New York Magazine* was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea The Nature Conservancy Magazine, 1989 *Nature Conservancy*, 1989 **Im/Tb Ess Physical Anthro** Jurmain, 2003-07

Disability and Animality Stephanie Jenkins, Kelly Struthers Montford, Chloë Taylor, 2020-03-26 The fields of Critical Disability Studies and Critical Animal Studies are growing rapidly but how do the implications of these endeavours intersect Disability and Animality *Crip Perspectives in Critical Animal Studies* explores some of the ways that the oppression of more than human animals and disabled humans are interconnected Composed of thirteen chapters by an international team of specialists plus a Foreword by Lori Gruen the book is divided into four themes Intersections of Ableism and Speciesism Thinking Animality and Disability together in Political and Moral Theory Neurodiversity and Critical Animals Studies Melancholy Madness and Misfits This book will be of interest to undergraduate and postgraduate students as well as

The Bonobo and the Atheist Frans de Waal, 2013-03-18 In this lively and illuminating discussion of his landmark research esteemed primatologist Frans de Waal argues that human morality is not imposed from above but instead comes from within Moral behavior does not begin and end with religion but is in fact a product of evolution For many years de Waal has observed chimpanzees soothe distressed neighbors and bonobos share their food Now he delivers fascinating fresh evidence for the seeds of ethical behavior in primate societies that further cements the case for the biological origins of human fairness Interweaving vivid tales from the animal kingdom with thoughtful philosophical analysis de Waal seeks a bottom up

explanation of morality that emphasizes our connection with animals In doing so de Waal explores for the first time the implications of his work for our understanding of modern religion Whatever the role of religious moral imperatives he sees it as a Johnny come lately role that emerged only as an addition to our natural instincts for cooperation and empathy But unlike the dogmatic neo atheist of his book s title de Waal does not scorn religion per se Instead he draws on the long tradition of humanism exemplified by the painter Hieronymus Bosch and asks reflective readers to consider these issues from a positive perspective What role if any does religion play for a well functioning society today And where can believers and nonbelievers alike find the inspiration to lead a good life Rich with cultural references and anecdotes of primate behavior *The Bonobo and the Atheist* engagingly builds a unique argument grounded in evolutionary biology and moral philosophy Ever a pioneering thinker de Waal delivers a heartening and inclusive new perspective on human nature and our struggle to find purpose in our lives The Video Librarian ,1995 *The Bonobo and the Atheist: In Search of Humanism Among the Primates* Henry Cabot Lodge (Jr.),Frans B. M. Waal,2013-03-25 Moral behavior does not begin and end with religion but is in fact a product of evolution **Good Natured** Frans B. M. DE WAAL,F. B. M. de Waal,2009-06-30 To observe a dog s guilty look to witness a gorilla s self sacrifice for a wounded mate to watch an elephant herd s communal effort on behalf of a stranded calf to catch animals in certain acts is to wonder what moves them Might there be a code of ethics in the animal kingdom Must an animal be human to be humane In this provocative book a renowned scientist takes on those who have declared ethics uniquely human Making a compelling case for a morality grounded in biology he shows how ethical behavior is as much a matter of evolution as any other trait in humans and animals alike World famous for his brilliant descriptions of Machiavellian power plays among chimpanzees the nastier side of animal life Frans de Waal here contends that animals have a nice side as well Making his case through vivid anecdotes drawn from his work with apes and monkeys and bolstered by the intriguing voluminous data from his and others ongoing research de Waal shows us that many of the building blocks of morality are natural they can be observed in other animals Through his eyes we see how not just primates but all kinds of animals from marine mammals to dogs respond to social rules help each other share food resolve conflict to mutual satisfaction even develop a crude sense of justice and fairness Natural selection may be harsh but it has produced highly successful species that survive through cooperation and mutual assistance De Waal identifies this paradox as the key to an evolutionary account of morality and demonstrates that human morality could never have developed without the foundation of fellow feeling our species shares with other animals As his work makes clear a morality grounded in biology leads to an entirely different conception of what it means to be human and humane **San Francisco Focus** ,1989 *New York* ,1991
