describe adults expectations of the various provisions and the values of the activities pursued in them Of special interest is the emphasis placed by adults upon fantasy play and the often large discrepancy between expectation and practice Also covered are the difference in the play activities of part time and full time nursery school children and the transition from pre school to first school The book will still be of historical interest to pre school practitioners to developmental psychologists and to educational administrators

Living Systems, Evolving Consciousness, and the Emerging Person Louis Sander,2012-05-22 This collection of previously published papers can be viewed as a story of the gradual emergence of an overarching idea through the course of a life s work The idea concerns the way emerging knowledge of developmental processes biological systems and therapeutic process can be integrated in terms of basic principles that govern the living system as an ongoing creative process a process in which there is a continuing impetus both energizing and motivational that moves the living system toward an enhanced coherence in its engagement with its surround as it achieves an ever increasing inclusiveness of complexity The papers have been selected in a roughly chronological order from a career of early developmental research within the background of psychoanalytic thinking The biological underpinnings of psychoanalysis can be extended by systems thinking Our notions of the evolution of consciousness can also

be extended from this simple level of a neural machinery essential for adaptation and survival to the capacity for the awareness of one's own inner state within the flow of one's engagement with one's surround. From this enrichment of inner experiencing through evolving self-awareness the unique organization of the person emerges within the developmental process from expectancies and emotions to values meaning purpose goals and direction. The title of the book has been chosen to capture this sequence. Further evolution of conscious organization will enable the human species to achieve the state of being together with and yet distinct from as the system as a whole on a wider more global level gains increasing coherence as its complexity increases. Hopefully the implications of this idea will emerge in the reader's thinking as the chapters move from the level of adaptation to recognition.
