Sharing Power Donald F. Kettl, 2011-07-01 In the flush of enthusiasm to make government work better reformers from both left and right have urged government to turn as many functions as possible over to the private sector and to allow market competition instill efficiency and choice In fact government has been doing just this for years every major policy initiative launched since World War II has been managed by public private partnerships Yet such privatization has not solved government s problems While there have been some positive results there has been far less success than advocates of market competition have promised In a searching examination of why the competition prescription has not worked well Donald F Kettl finds that government has largely been a poor judge of private markets Because government rarely operates in truly competitive markets contracting out has not so much solved the problems of inefficiency but has aggravated them

Government has often not proved to be an intelligent consumer of the goods and services it has purchased Kettl provides specific recommendations as to how government can become a smart buyer knowing what it wants and judging better what it has bought Through detailed case studies Kettl shows that as market imperfections increase so do problems in governance and management He examines the A 76 program for buying goods and services the FTS 2000 telecommunications system the Superfund program the Department of Energy s production of nuclear weapons and contracting out by state and local governments He argues that government must be more aggressive in managing contracts if it is to build successful partnerships with outside contractors Kettl maintains that the answer is not more government but a smarter one which requires strong political leadership to refocus the bureaucracy s mission and to change the bureaucratic culture MI6 and the Machinery of Spying Philip Davies,2004-06 Philip H J Davies is one of a growing number of British academic scholars of intelligence but the only academic to approach the subject in terms of political science rather than history He wrote his PhD at the University of Reading on the topic Organisational Development of Britain s Secret Intelligence Service 1909 1979 and has published extensively on intelligence and defence issues After completing his PhD he taught for a year and a half on the University of London external degree programme in Singapore before returning to the UK to lecture at the University of Reading for two years He was formerly Associate Professor of International and Security Studies at the University of Malaya in Malaysia where he not only conducted his research but provided a range of training and consultancy services to the Malaysian intelligence and foreign services He is now based at Brunel University UK *Using Knowledge and Evidence in Health Care* François Champagne,Louise Lemieux-Charles,2008-05-24 At the clinical management and policy levels the use of knowledge and evidence in health care has become a worldwide priority The contributors to *Using Knowledge and Evidence in Health Care* seek to broaden our understanding of the complexity involved in health care decision making by integrating social science knowledge and exploring some of the challenges and limits of evidence in different health care contexts Louise Lemieux Charles and François Champagne have brought together an esteemed group of scholars to provide a conceptual framework that illustrates the factors critical to analysing and optimizing the use of knowledge and evidence Previous studies have focused primarily on the medical literature without acknowledging the social sciences tradition With its integration of works from political science public policy informatics and other disciplines *Using Knowledge and Evidence in Health Care* provides a bridge between both worlds By bringing together different views on the topic the volume goes beyond strict disciplinary boundaries to provide the fullest exploration of knowledge and evidence in health care **Public Budgeting and Finance, Fourth Edition**, Robert T. Golembiewski,1997-06-09 This incomparable Fourth Edition of a standard reference text has been thoroughly updated and enlarged offering comprehensive coverage of the field in a single source and incorporating entirely new as well as time tested material Fool Me Twice Thomas E.
