Our Resonant Universe:

Our Resonant Universe Douglas A. Pinnow, Kirk Miller, 2003 Our Resonant Universe presents the resonance model a ground breaking vision of the nature of the universe By applying a simple electromagnetic approach to both elemental matter and nuclear reactions Pinnow and Miller unite mass spin and charge with the four fundamental forces of the universe without invoking the arbitrary constants of the standard model or the multi dimensional mathematics of string theory The results are striking in their accuracy and in their descriptive power The model also provides a series of predictions that will soon put this conception of the universe to the test
