

PRIMARY SCIENCE AND TECHNOLOGY

Di Bentley and Mike Watts

Primary Science And Technology Practical Alternatives

Shawn M. Glynn, Reinders Duit

Primary Science And Technology Practical Alternatives:

Primary Science and Technology Di Bentley, Mike Watts, 1994 This book explores the ways in which science and technology can take place in the early and middle years at school At the heart of the book are a number of case studies of actual practice drawn from primary schools in action These studies contribute to a theoretical approach grounded in childrens learning and are used in exploring the real problems of planning management organization teaching and learning as classroom practitioners try to implement new curriculum directives The chapters examine the nature of learning experiences the practice of teaching teaching for specific skills the role of the specialist coordinator assessment and record keeping scientific and technological problem solving and working for equal opportunities The authors draw on their own wide experience in science education and upon their work with teachers in primary classrooms *Aspects of Teaching*

Secondary Science Sandra Amos, Richard Boohan, 2003-09-02 This book s structure reflects the different dimensions to learning science The first section focuses on the importance of talk in the science classroom while the second explores the key role of practical work The third section is concerned with the creative theoretical aspect of science Section four follows this by considering the communication of ideas and how pupils learn to participate in the discourse of the scientific community Section five emphasizes the place of science in the broader context considering its moral and ethical dimensions and its place in a cultural context Finally section six explores the complexity of the task faced by science teachers highlighting the knowledge and skills science teachers must acquire in order to create an environment in which students are motivated to learn science **Problem Solving in Science and Technology** Roehampton Institute, 1994 Problem solving has been identified as a core skill in the National Curriculum This work aims to extend the application of problem solving techniques in science and technology teaching across the phases of education primary secondary and further education

Improving Secondary Science Teaching John Parkinson, 2004 John Parkinson encourages teachers to reflect on their current teaching practice and guides them to improving their teaching and consequently their pupils learning **Register of Educational Research in the United Kingdom** National Foundation For Educational Research, 2005-11-30 First published in 1998 Routledge is an imprint of Taylor Francis an informa company *Learning Science in the Schools* Shawn M. Glynn, Reinders Duit, 2012-10-12 Science and the technology derived from it is having a dramatic impact on the quality of our personal lives and the environment around us Science will have an even greater impact on the lives of our students The lives of scientifically literate students will be enriched by their understanding appreciation and enjoyment of the natural world To prosper in the near future all students must become scientifically literate and embrace the notion of life long learning in science Without scientific literacy it will become impossible for students to make informed decisions about the interrelated educational scientific and social issues that will confront them in the future Intended for science teachers teacher educators researchers and administrators this volume is concerned with the innovative research that is reforming

how science is learned in schools The chapters provide overviews of current research and illustrate how the findings of this research are being applied in schools This research based knowledge is essential for effective science instruction The contributors are leading authorities in science education and their chapters draw clear connections among research theory and classroom practice They provide excellent examples from science classes in which their research has reformed practice This book will help educators develop the scientific literacy of students It bridges the gap between cutting edge research and classroom practice to provide educators with the knowledge they need to foster students scientific literacy *Gandhian Alternative (vol. 5 : Education For All)* Suresh Misra,2005 **Communicating In School Science** Di Bentley, Mike Watts,2005-07-20 First published in 1991 This practical teacher text in acknowledging both the importance of the role of communication in the teaching of science and National Curriculum guidelines examines classroom processes as they relate both to individual learning and to group work in the science classroom *An assessment of alternative economic stockpiling policies.* , *International Bulletin of Bibliography on Education* ,1994
