Princeton and the Republic, 1768-1822 Mark A. Noll, 2004. Widely viewed during the Revolutionary period as a champion of both republicanism and evangelical Calvinism, the College of New Jersey nonetheless experienced great inner turmoil as its leaders tried to support the stability of the new nation by integrating sound principles of science and faith. Focusing on three presidencies—those of John Witherspoon, Samuel Stanhope Smith, and Ashbel Green—Mark Noll relates the dramatic institutional history of what is now Princeton University, a history closely related to the intellectual development of the early republic. Noll examines in detail the student rebellions and the trustees' disillusionment with the college, which, despite Witherspoon's and Stanhope Smith's efforts to harmonize traditional Reformed faith with a moderate Scottish enlightenment, led to the establishment of a separate Presbyterian seminary in 1812. As a cultural and intellectual history of the early United States, this book deepens our understanding of how science, religion, and politics interacted during the period. Close attention is given to the Scottish philosophy of common sense, which Stanhope Smith developed into an educational vision that he hoped would encourage a stable social order. Mark A. Noll, PhD, Vanderbilt University, teaches Christian thought and church history at Wheaton College. He is author of more than ten books, including *Religion and American Politics*. Christian.

Ebony and Ivy Craig Steven Wilder, 2014-09-02. Schools for Statesmen Andrew H. Browning, 2022-06-16. Whatever principles are imbibed at college will run through a man's whole future conduct. William Livingston, signer of the Constitution. *Schools for Statesmen* explores the fifty-five individual framers of the Constitution in close detail and argues that their different educations help explain their divergent positions at the 1787 Constitutional Convention. Those educations ranged from outlawed Irish hedge schools to England's venerable Inns of Court, from the grammar schools of New England to ambitious new academies springing up on the Carolina frontier. The more traditional schools that focused on Greek and Latin classics—Oxford, Harvard, Yale, William and Mary—were

deeply conservative institutions resistant to change But the Scottish colleges and the newer American schools Princeton Philadelphia King s College introduced students to a Scottish Enlightenment curriculum that fostered more radical forward thinking leaders Half of the Framers had no college education and were often self taught or had private tutors most were quiet at the convention although a few stubbornly opposed the new ideas they were hearing Nearly all the delegates who took the lead at the convention had been educated at the newer innovative colleges but of the seven who rejected the new Constitution three had gone to the older traditional schools while three others had not gone to college at all Schools for Statesmen is an unprecedented analysis of the sharply divergent educations of the Framers of the Constitution It reveals the ways in which the Constitutional Convention rather than being a counterrevolution by conservative elites was dominated by forward thinking innovators who had benefited from the educational revolution beginning in the mid eighteenth century Andrew Browning offers a new and persuasive explanation of key disagreements among the Framers and the process by which they were able to break through the impasse that threatened the convention he provides a fresh understanding of the importance of education in what has been called the Critical Period of US history Schools for Statesmen takes a deep dive into the diverse educational world of the eighteenth century and sheds new light on the origins of the US Constitution

Le Beau, 2021-12-14 During the eighteenth century Presbyterians of the Middle Colonies were separated by divergent allegiances mostly associated with groups migrating from New England with an English Puritan background and from northern Ireland with a Scotch Irish tradition Those differences led first to a fiery ordeal of ecclesiastical controversy and then to a spiritual awakening and a blending of diversity into a new order American Presbyterianism Several men stand out not only for having been tested by this ordeal but also for having made real contributions to the new order that arose from the controversy The most important of these was Jonathan Dickinson Bryan Le Beau has written the first book on Dickinson whom historians have called the most powerful mind in his generation of American divines One of the founders of the College of New Jersey now Princeton University and its first president Dickinson was a central figure during the First Great Awakening and one of the leading lights of colonial religious life Le Beau examines Dickinson s writings and actions showing him to have been a driving force in forming the American Presbyterian Church accommodating diverse traditions in the early church and resolving the classic dilemma of American religious history the simultaneous longing for freedom of conscience and the need for order This account of Dickinson s life and writings provides a rare window into a time of intense turmoil and creativity in American religious history **The Piety of John Witherspoon** L.
