Beyond Cages Justin Marceau, 2019-04-11 Demonstrates how carceral animal law strategies put animal protection efforts at war with general anti oppression and civil rights efforts

Protecting Animals Within and Across Borders Charlotte E. Blattner, 2019 How can we protect animals more effectively both at home and abroad given the ongoing globalization of animal production This book provides a catalogue of options for extraterritorial jurisdiction which states can employ to strengthen their animal laws It offers top down perspectives drawn from general international law and trade law and complements them by a bottom up view from the perspective of animal law

Law and the Question of the Animal Yoriko Otomo, Edward Mussawir, 2013-02-11 This book addresses the problem of animal life in terms that go beyond the usual extension of liberal rights to animals The discourse of animal rights is one that increasingly occupies the political ethical and intellectual terrain of modern society But although the question of the status of animals holds an important place within a range of civil political and technological disciplines the issue of rights in relation to animals usually rehearses the familiar perspectives of legal moral and humanist philosophy Animal law is fast becoming a topic of significant contemporary interest and discussion This burgeoning interest has not however been matched by renewed inquiry into the jurisprudential frames and methods for the treatment of animals in law nor the philosophical issue of the human and the animal that lies at law s foundation Responding to this interest Law and the Question of the Animal A Critical Jurisprudence brings together leading and emerging critical

legal theorists to address the question of animality in relation to law's foundations, practices and traditions of thought. In so doing it engages a surprisingly underdeveloped aspect of the moral philosophies of animal rights, namely their juridical register and existence. How does animal law alter our juridical image of personality or personhood? How do the technologies of law intersect with the technologies that invent, create and manage animal life? And how might the ethical, ontological and ceremonial relation between humans and animals be linked to a common source or experience of law? Integrationism and the Self Christopher Hutton, 2019-04-10. In recent years a set of challenging questions have arisen in relation to the status of animals, their treatment by human beings, their cognitive abilities and the nature of their feelings, emotions and capacity for suffering. This ground-breaking book draws from integrational semiology to investigate arguments around the rights of certain animals to be recognized as legal persons, thereby granting them many of the protections enjoyed by humans. In parallel with these debates, the question of the legal personality of artificial intelligence (AI) systems has moved to the forefront of legal debate, with entities such as robots, cyborgs, self-driving cars and genetically engineered beings under consideration. Integrationism offers a framework within which the wider theoretical and practical issues can be understood. Law requires closure and categorical answers; integrationism is an open-ended form of inquiry that is seen as removed from particular controversies. This book argues that the two domains can be brought together in a challenging and productive synthesis. A much-needed resource to examine the heart of this fascinating debate and a must-read for anyone interested in semiology, linguistics, philosophy, ethics and law. Berkowitz, 2018-04-19. This book offers new perspectives on animals and animality from the vantage point of the rabbis of the Babylonian Talmud. The Broadview Anthology of Social and Political Thought - Volume 2: The Twentieth Century and Beyond Andrew Bailey, Samantha Brennan, Will Kymlicka, Jacob T. Levy, Alex Sager, Clark Wolf, 2008-09-12. The second volume of this comprehensive anthology covers the twentieth and early twenty-first centuries. The anthology is broad-ranging both in its selection of material by figures traditionally acknowledged as being of central importance and in the material it presents by a range of other figures. The material in this volume is presented in three sections. The first, Power and the State, includes selections by such figures as Goldman, Lenin, Weber, Schmitt and Hayek. Among those included in the Race, Gender and Colonialism section are de Beauvoir, Gandhi, Fanon and Young. The third, and by far the longest section, Rights-Based Liberalism and its Critics, focuses on the many interrelated directions that social and political philosophy has taken since the publication of John Rawls's ground-breaking *A Theory of Justice* in 1971. In order to better meet the needs of today's students, the editors have made every effort to include accurate and accessible translations of the readings. Additionally, every selection has been painstakingly annotated and each figure is given a substantial introduction highlighting her or his major contributions within the tradition. For figures of central importance, the editors

have included extended introductions that place the figure in the context of intellectual history as well as of political thought In order to ensure the highest standards of accuracy and accessibility the editors have consulted dozens of leading academics during the course of the volume s development many of whom have contributed introductory material as well as advice The result is an anthology with unparalleled pedagogical benefits The Broadview Anthology of Social and Political Thought sets the new standard for social and political philosophy instruction **Unlocking the Mysteries of Genesis** Henry M.

studies in important new directions it re examines basic assumptions suggests new paradigms for how we can live and function ecologically in a world that is not simply ours It argues that it is not enough to recognise the ethical demands placed upon us by our encounters with animals or to critique our often murderous treatment of them this simply reinforces human exceptionalism Featuring contributions from leading academics lawyers artists and activists the book examines key issues such as How compassion for animals reinforces ideas of what distinguishes human beings from other animals How speciesism and human centrality are built into the legal system How individualist subjectivity works in relation to animals who may not think of themselves in the same way How any consideration of animal others must involve a radical deconstruction of our very notion of the human How art philosophy and literature can both avoid speciesism and deliver the human from subjectivity This volume is a unique project which stands at the cutting edge of both animal rights philosophies and posthuman artistic abstract philosophies of identity It will be of great interest to undergraduates and researchers in philosophy ethics particularly continental philosophy critical theory and cultural studies
