**Gamma-Ray Bursts** Gilbert Vedrenne, Jean-Luc Atteia, 2009-03-20 Since their discovery was first announced in 1973 gamma ray bursts GRBs have been among the most fascination objects in the universe While the initial mystery has gone the fascination continues sustained by the close connection linking GRBs with some of the most fundamental topics in modern astrophysics and cosmology Both authors have been active in GRB observations for over two decades and have produced an outstanding account on both the history and the perspectives of GRB research

High Resolution X-ray Spectroscopy of Cosmic Plasmas International Astronomical Union. Colloquium, 1990-04-26 This book gives an account of the proceedings of the International Astronomical Union Colloquium 115 High Resolution X Ray Spectroscopy of Cosmic Plasmas This was the first IAU meeting dedicated to high resolution X ray spectroscopy of objects outside the solar system A broad range of objects and astrophysical conditions are discussed Results from the first generation of satellites with spectroscopic capability i e the Einstein Observatory EXOSAT and Tenma are reviewed from a perspective of a more precise interpretation allowed by improved theoretical models and plasma diagnostics Laboratory and solar X ray results that model or are relevant to conditions found in cosmic X ray sources are also presented The colloquium presents a forum for discussion of scientific objectives of new international missions in high resolution X ray spectroscopy

**Use of X-Ray Crystallography in the Design of Antiviral Agents** W Laver, 2012-12-02 Use of X Ray Crystallography in the Design of Antiviral Agents describes materials presented at an International Workshop held in Kona Hawaii on February 6 8 1989 which discussed the use of X ray crystallography in the design of antiviral agents This book

focuses on the approach that determines the three dimensional structures of viruses and virus proteins with biological activity such as computer molecular modeling The three dimensional structures of a number of immune complexes that involve complexes of antigen with antibodies or peptide antigens complexed with an MHC molecule are also deliberated This text emphasizes that the three dimensional structures allow the rational design of virus replication inhibitors that control virus infections in man and economically important domestic animals This publication is a good reference for pharmacists biochemists and clinicians researching on the design of antiviral agents     Reverse Engineering Wego Wang,2010-09-16 The process of reverse engineering has proven infinitely useful for analyzing Original Equipment Manufacturer OEM components to duplicate or repair them or simply improve on their design A guidebook to the rapid fire changes in this area Reverse Engineering Technology of Reinvention introduces the fundamental principles advanced methodologie     **Assembler's Guide to Diagnostic X-ray Equipment Under the Federal Performance Standard** United States. Bureau of Radiological Health,1975     **Supernovae and Gamma-Ray Bursters** Kurt Weiler,2008-01-11 Since the dawn of mankind observers of the sky have wondered at the sudden appearance of new stars on the seemingly unchanging heavens and for at least 2000 years have recorded these phenomena in their annals and archives Even in more modern times since the discovery of SN1885A in S Andromeda which gured in the important island universe discussions of the 1920 s the puzzle of supernovae SNe has played an important role in astrophysics Only with the seminal work of Fritz Zwicky and Walter Baade in the 1930 s did we begin to understand the di erences between novae and SNe and the importance of SNe as the fonts of energy for the interstellar medium and as drivers of chemical evolution in galaxies As recently as the 1940 s and 1950 s the early days of radio astronomy were heavily in uenced by the familiar names of Cassiopeia A and Taurus A two young supernova remnants and two Nobel prizes have been awarded for discovery and study of a related phenomenon pulsars In spite of the great age of the study of SNe since at least the Chinese records of SN185and probably earlier the eld is in fact very young having only attracted a large devoted following since the spectacular Type II SN1987A in the Large Magellanic Cloud the rst naked eye SN in more than 400 years     **Assembler's Guide to Diagnostic X-ray Equipment** United States. Bureau of Radiological Health,1975     Assembler's Guide to Diagnostic X-ray Equipment United States. Bureau of Radiological Health. Division of Compliance,1980     **Archives of the Roentgen Ray** ,1910     **Radiography X-ray Therapeutics and Radium Therapy** Robert Knox,1923     **Atlas of the Reverse Side of the Moon** ,1969     **Introduction to Lens Design** José Sasián,2019-09-26 A concise introduction to lens design including the fundamental theory concepts methods and tools used in the field Covering all the essential concepts and providing suggestions for further reading at the end of each chapter this book is an essential resource for graduate students working in optics and photonics     X-ray Absorption Fine Structure for Catalysts and Surfaces Yasuhiro Iwasawa,1996 X ray absorption fine structure XAFS is a powerful technique in characterization of structures and electronic states of materials in many research fields including e g catalysts

semiconductors optical ingredients magnetic materials and surfaces This characterization technique could be applied in a static or a dynamic state in situ condition The XAFS can provide information that is not accessible by other techniques for characterization of materials particularly catalysts and related surfaces Furthermore XAFS can provide a molecular level approach to the study of reaction mechanisms for the understanding of catalysts and development of new catalysts A number of synchrotron radiation facilities have been planned to be built in Asian countries in addition to the high brilliant synchrotron radiation facilities under construction in the USA Europe and Japan The applications of XAFS have now expanded to catalytic chemistry and engineering surface science organometallic chemistry materials science solid state chemistry geophysics etc This book caters to a wide range of researchers and students working in the domain or related topics

**Gamma-ray Bursts** Chryssa Kouveliotou, Ralph A. M. J. Wijers, Stan Woosley, 2012-11-22 Cosmic gamma ray bursts GRBs have fascinated scientists and the public alike since their discovery in the late 1960s Their story is told here by some of the scientists who participated in their discovery and after many decades of false starts solved the problem of their origin Fourteen chapters by active researchers in the field present a detailed history of the discovery a comprehensive theoretical description of GRB central engine and emission models a discussion of GRB host galaxies and a guide to how GRBs can be used as cosmological tools Observations are grouped into three sets from the satellites CGRO BeppoSAX and Swift and followed by a discussion of multi wavelength observations This is the first edited volume on GRB astrophysics that presents a fully comprehensive review of the subject Utilizing the latest research Gamma ray Bursts is an essential desktop companion for graduate students and researchers in astrophysics

*Reverse Engineering of Ancient Metals* Patricia Silvana Carrizo, 2022-01-01 This book examines archaeometallurgy and the preservation of ancient materials for cultural heritage Through understanding the internal structures of relevant ancient materials their chemical composition resistance hardness etc their conservation can be more effectively addressed Preserving cultural artifacts such as those from border sites funerary contexts burials railway lines ceremonial sites and road infrastructure is necessary to provide perspective to a culture s trajectory This book addresses how Reverse Engineering can disseminate knowledge of a culture s heritage by offering technology that can help restore artifacts so they may be displayed and utilized as educational objects

Supernovae and Gamma-Ray Bursts Mario Livio, Nino Panagia, Kailash Sahu, 2001-07-02 Since the dramatic discovery that the supernova SN1998bw coincided in position and time with a gamma ray burst the possibility was raised that these two types of spectacular explosions are related This timely volume presents especially written articles by a host of world experts who gathered together for an international conference at the Space Telescope Science Institute This was the first meeting in which the communities of supernova researchers and gamma ray burst researchers were brought together to share ideas The contributions review the mechanisms for these explosive events the possible connections between them and their relevance for cosmology Both observations and theoretical developments are covered This book is an invaluable source of information

for both active researchers and graduate students in this exciting area of research
