## **Re Engineering Female Friendly Science:**

Re-engineering Female Friendly Science Sue Vilhauer Rosser, 1997 Sue Rosser's pioneering 1990 work *Female Friendly Science* introduced feminist teaching methods to maths and science education and gave us a six stage model for transforming curricula to attract and retain women in science engineering and mathematics programmes So successful was this new pedagogical paradigm that its reforms were assimilated into mainstream science education but ironically sacrificed their appeal to women in the process Now in this study Rosser revisits the feminist origins of curriculum transformation and puts the gender back in gender equity

Re-visioning Science Education from Feminist Perspectives, 2010-01-01 Women in science education are placed in a juxtaposition of gender roles and gendered career roles Using auto biography and auto ethnography this book examines the challenges and choices of academic women in science education and how those challenges have changed or remained consistent since women have become a presence in science education The book's contributors span a temporal and spatial continuum and focus on how a variety of issues relate to the paradoxes for academic women in science education Science is characterized as a masculine endeavor while teaching is described as women's true profession Thus female academics involved in science education are positioned in two paradoxes First as teachers they are involved in a feminized profession However within that profession women faculty in science education work in a discipline viewed as a masculine enterprise Further these women work in educational institutions that have higher status and prestige than their sisters in elementary middle or high schools Second female professors are bearded mothers Women who have engaged in science education value rationality and logic and assume authority as participants in academe The use of logic the acceptance of authority and the assumption of power are masculine gender stereotyped characteristics This situation places women in a paradox because others including peers and students expect them to display stereotypic female gender dispositions such as mothering nurturing sacrificing their needs for others and a commitment to the institution The topics include discussing how their engagement with science impacted their career trajectories and re direction from science to science education the relationships of cultural and racial factors on career trajectories and the dialectical relationship between women's private public lives and their agency collective and individual in the academy and its enactment within academic fields The book documents the lives and careers of academic women in science education from the United States Australia the Caribbean United Kingdom and Europe

**Feminist Developmental Psychology** Patricia H. Miller, Ellin Kofsky Scholnick, 2014-06-03 This collection of original essays integrates the exciting recent scholarship on feminist theories and methods into developmental psychology. It also acquaints women's studies scholars with issues in developmental psychology that raise interesting questions for feminist theories. Its focus goes beyond that of traditional scholarship that tends to focus only on sex differences and sex roles; instead, it considers alternative views of what is worth studying, how one should study it, etc. The chapters provide new feminist perspectives on topics of great current interest to developmental psychologists.

**Body Politics and the Fictional Double** Debra Walker King, 2000-10-22 *Body Politics and the Fictional Double* Edited by Debra Walker King Examines the disjunction between women's appearance and reality. In recent years, questions concerning the body and its place in postmodern discourses have taken center stage in academic disciplines. *Body Politics* joins these discussions by focusing on the challenges women face when their externally defined identities and representations as bodies—their body fictions—speak louder than what they know to be their true selves. Racialized, gendered, or homophobic body fictions disfigure individuals by placing them beneath a veil of invisibility and by political, emotional, or spiritual suffocation. As objects of interpretation, female bodies in search of health care, legal assistance, professional respect, identity confirmation, and financial security must first confront their fictionalized doubles in a collision that in many cases ends in disappointment, distress, and even suicide. The contributors reflect on women's day-to-day lives and the cultural productions—literature, MTV, film, etc.—that give body fictions their power and influence. By exploring how these fictions are manipulated politically, expressively, and communally, they offer reinterpretations that challenge the fictional double while theorizing the discursive and performative forms it takes. Contributors include Trudier Harris, Maude Hines, S. Yumiko Hulvey, Debra Walker King, Sue V. Rosser, Stephanie A. Smith, Maureen Turim, Caroline Vercoe, Gloria Wade Gayles, and Rosemary Weatherston. Debra Walker King, Associate Professor of English at the University of Florida, Gainesville, is author of *Deep Talk: Reading African American Literary Names*. She has published articles and reviews in *Names*, the *Journal of the American Name Society*, *Philosophy and Rhetoric*, and *African American Review*. Contents: Introduction: Body Fictions, Debra Walker King; Who Says an Older Woman Can't? Shouldn't Dance?, Gloria Wade Gayles; When Body Politics of Partial Identifications Collide with Multiple Identities of Real Academics: Limited Understandings of Research and Truncated Collegial Interactions, Sue V. **Gender and Information Technology: Moving Beyond Access to Co-Creat** Global Partnership Kirk, Mary, 2008-09-30 This book explores the decline in female involvement in technology and other discrimination related to

the industry Provided by publisher *Teaching as Activism* Linda June Muzzin, Peggy Tripp, 2005 Weaving together concerns about environmental and social justice Teaching as Activism brings together constructive demands for change and theoretical debate Written by activists who also teach the essays challenge the current pedagogical literature with proposals that would bring discussion of social and environmental responsibility into postsecondary science the classroom and the community With backgrounds in feminist science and Indigenous knowledges critiques the contributors emphasize the importance of appreciating Indigenous knowledges recognizing our bias about how knowledge is presently produced and integrating science with a human spiritual connection to nature The goals are to question the legacies of colonialism capitalism and globalization and create a more inclusive interdisciplinary education

**Transforming the Disciplines** Renee P Prys, Mary Jane Cherry, Susan Popham, Elizabeth L Macnabb, 2013-10-31 A jargon free non technical and easily accessible introduction to women s studies All too many students enter academia with the hazy idea that the field of women s studies is restricted to housework birth control and Susan B Anthony Their first encounter with a women s studies textbook is likely to focus on the history and sociology of women s lives While these topics are important the emphasis on them has led to neglect of equally important issues Transforming the Disciplines A Women s Studies Primer is one of the first women s studies textbooks to show feminist scholarship as an active force changing the way we study such diverse fields as architecture bioethics history mathematics religion and sports studies Although this text was designed as an introduction to women s studies it is also rewarding for upper level or graduate students who want to understand the pervasive effects of feminist theory Most chapters provide a bibliography or list of further reading of significant works Its clear jargon free prose makes feminist thought accessible to general readers without sacrificing the revolutionary power of its ideas In almost thirty essays covering a broad range of subjects from anthropology to chemistry to rhetoric Transforming the Disciplines exemplifies the changes achieved by feminist thought Transforming the Disciplines combines a high standard of writing and scholarship with personal insight includes both traditional academic arguments and alternative non agonistic forms of discussion embraces an international scope challenges traditional assumptions models and methodologies offers an inter and multidisciplinary approach strengthens readers understanding of the big picture not only for women but for all disempowered groups critiques feminism as well as patriarchal society Feminist theory is grounded in a questioning of traditional assumptions about what is right natural and self evident not just about the roles and nature of men and women but about how we think what we teach whose experience matters and what is important Transforming the Disciplines is the first textbook to show the consequences of those questions not the answers themselves but the consequences of the willingness to ask and the transformations that have occurred when the right answers changed

*Removing Barriers* Jill M. Bystydzienski, Sharon R. Bird, 2006-03-20 Movement into academic science technology engineering and mathematics STEM fields has been slow for women and minorities Not only are women and minorities underrepresented in STEM careers there

is strong evidence that many academic departments are resistant to addressing the concerns that keep them from entering careers in these fields In light of recent controversies surrounding these issues this volume examining reasons for the persistence of barriers that block the full participation and advancement of underrepresented groups in the sciences and addressing how academic departments and universities can remedy the situation is particularly timely As a whole the volume shows positive examples of institutions and departments that have been transformed by the inclusion of women and recommends a set of best practices for continuing growth in positive directions
