Reach Of The State Sketches Of The Chinese Body Politic:

The Reach of the State Vivienne Shue, 1990-02-01 These four conceptual and critical essays on state and society in contemporary China argue vigorously against the grain of prevailing scholarly interpretation. In substantive content they explore two major themes from different historical and theoretical points of departure. First the author argues that the party state under Mao fell far short of the full control over China's peasant society that outside observers often assumed it had achieved. She shows instead how the Maoist state frequently pursued policies that in fact had the ironic effect of strengthening the resistance of rural communities against the central political apparatus. Second she contends that once the true limitations on the Maoist state's power in rural areas are rightly understood it becomes clear that one effect of the post-Mao economic and political reforms may be to enhance rather than to diminish the state's authority in the countryside despite all the reformists' rhetoric to the contrary. These essays on how to think about the Chinese state are designed to stimulate debate about assumptions and methods in the field of Chinese political analysis. The controversies they raise however make them highly relevant to scholars outside Chinese studies who are interested in theories of the state in the interrelations of state and society and in the fate of the peasantry under socialism. *Civilization and the Chinese Body Politic* Yongnian Zheng, 2022-11-22 In this important and hugely ambitious book one of the world's leading political scientists working on China demonstrates how Western views of China are flawed because the long tradition of Western scholarship studying China views China from the Western philosophical and intellectual perspective rather than viewing China on its own terms through the lens of China's own long established and reputable philosophical and intellectual tradition. Providing a deep analysis of Western scholarship on China including work from Leibniz to Marx to Weber and then to Wittfogel and a thorough account of the evolution of China's own thinking about governance as expressed in the practices of successive Chinese dynasties the book goes on to examine how the current Chinese body politic fits with and is the natural outcome of China's own long well thought through and well practiced intellectual consideration of what the nature of civilized governance should be. By focusing on philosophical and intellectual approaches rather than on theoretical or methodological ones the book shows how the huge and increasing disconnect between non-Chinese views of China and Chinese ones has come about. **The Chinese Women's Movement Between State and Market** Ellen R. Judd, 2002 This is the story of how the women's movement in China took advantage of the government's official efforts to position women in the rural economic reforms of the 1980s to achieve a significant and ever increasing role in China's developing turn toward a market economy which was not the state's intent. **State Power and Social Forces** Joel Samuel Migdal, Atul Kohli, Vivienne Shue, 1994-08-26 This eminently readable 1994 collection of high quality country specific essays on Third World politics provides through a variety of well integrated themes and approaches an examination of state theory as it has been practised in the past and how it must be refined for the future. The contributors go beyond the previously articulated bringing the state

back in model to offer their own state in society approach They argue that states which should be disaggregated for meaningful comparative study are best analysed as parts of societies States may help mould but are also continually moulded by the societies within which they are embedded States capacities further will vary depending on their ties to other social forces And other social forces will be capable of being mobilised into political contention only under certain conditions Political contention pitting states against other social forces may sometimes be mutually enfeebling but at other times mutually empowering

The State, Identity, and the National Question in China and Japan Germaine A. Hoston,2021-02-09 The first decades of the twentieth century witnessed an explosion of nationalist sentiment in East Asia as in Europe This comprehensive work explores how radical Chinese and Japanese thinkers committed to social change in this turbulent era addressed issues concerning national identity social revolution and the role of the national state in achieving socio economic development Focusing on the adaptation of anarchism and then Marxism Leninism to non European contexts Germaine Hoston shows how Chinese and Japanese theorists attempted to reconcile a relatively new appreciation for the nation state with their allegiance to a vision of internationalist socialist revolution culminating in stateless socialism Given the influence of Western experience on Marxism Chinese and Japanese theorists found the Marxian national question to be not merely one of whether the working man has no country but rather the much more fundamental issue of the relative value of Eastern and Western cultures Marxism argues Hoston thus placed native Marxists in tension with their own heritage and national identity The author traces efforts to resolve this tension throughout the first half of the twentieth century and concludes by examining how the

tension persists as Chinese and Japanese dissidents seek identity affirming modernity in accordance with the Western democratic model

Social Protest in Contemporary China, 2003-2010 Yanqi Tong, Shaohua Lei, 2013-11-12 China's economic transformation has brought with it much social dislocation which in turn has led to much social protest This book presents a comprehensive analysis of the large scale mass incidents which have taken place in the last decade The book analyses these incidents systematically discussing their nature causes and outcomes It shows the wide range of protests tax riots land and labour disputes disputes within companies including private and foreign companies environmental protests and ethnic clashes and shows how the nature of protests has changed over time The book argues that the protests have been prompted by the socioeconomic transformations of the last decade which have dislocated many individuals and groups whilst also giving society increased autonomy and social freedom enabling many people to become more vocal and active in their confrontations with the state It suggests that many protests are related to corruption that is failures by officials to adhere to the high standards which should be expected from benevolent government it demonstrates how the Chinese state far from being rigid bureaucratic and authoritarian is often sensitive and flexible in its response to protest frequently addressing grievances and learning from its own mistakes and it shows how the multilevel responsibility structure of the Chinese regime has enabled the central government to absorb the shock waves of social protest and continue to enjoy legitimacy

State in Post-1949 China** Shiping Zheng,1997-07-13 This book provides the most comprehensive analysis of one of the most important issues in China today the tensions between the Chinese Communist Party and the Chinese state legislative judicial administrative and military institutions Taking the neo institutionalist approach the author suggests that the Communist Party in post 1949 China faces an institutional dilemma the Party cannot live with the state and it cannot live without the state Zheng demonstrates that it is not only conceptually constructive but analytically imperative to distinguish the state from the Communist Party Secondly he integrates detailed study with broader generalizations about Chinese politics thus making efforts to overcome the tendency toward specialized scholarship at the expense of comparative and systemic understanding of China He also opens a new dimension of Chinese politics the uncertain and conflictual relationship between the Communist Party and the Chinese state *Managing Famine, Flood and Earthquake in China* Lauri Paltemaa,2015-10-05 China suffers frequently from many types of natural disasters which have affected the lives of many millions of Chinese The steps which the Chinese state has taken to prevent disasters mitigate their consequences and reconstruct in the aftermath of disasters are therefore key issues This book examines the single metropolis of Tianjin in northern China a city which has suffered particularly badly from natural disasters the great famine of 1958 61 the great flood of 1963 and the great earthquake of 1976 It discusses how the city managed these disasters what policies and measures were taken to prevent and mitigate disasters and to promote reconstruction afterwards It also explores who suffered from and who benefited from the disasters Overall the book shows how disaster management was erratic sometimes managed highly efficiently and in other cases disappointingly delayed and inept It concludes that although the Maoist state possessed formidable resources disaster management was always constrained by other political and economic considerations and was never an automatic priority
