Buffalo Society of Natural Sciences, 1929 Vol 18 1938 Seventy five years a history of the Buffalo society of natural sciences 1861 1936 3 p 1 5 204 p      *Understanding the Universe* James B. Seaborn, 2012-12-06 For the last eighteen years I have been teaching an introductory course in astrophysics The course is intended for nonscience majors satisfying a general education requirement in natural science It is a physics course with applications in astronomy The only prerequisite is the high school mathematics required for admission to the university For a number of years I used an astronomy text which I supplemented with lecture notes on physics There are many good astronomy texts available but this was not a satisfactory state of affairs since the course is a physics course The students needed a physics text that focused on astronomical applications Over the last few years I have developed a text which my students have been using in manuscript form in this course This book is an outgrowth of that effort The purpose of the book is to develop the physics that describes the behavior of matter here on the earth and use it to try to understand the things that are seen in the heavens Following a brief discussion of the history of astronomy from the Greeks through the Copernican Revolution we begin to develop the physics needed to understand three important problems at a level accessible to undergraduate nonscience majors 1 the solar system 2 the structure and evolution of stars and 3 the early universe All of these are related to the fundamental problem of how matter and energy behave in space and time      **Climbing New Hampshire's 48 4,000 Footers** Eli Burakian, 2018-12-01

Biersdorf, 2016-06-16 Infinite Reach Spirituality in a Scientific World connects and integrates the great spiritual insights with science and mathematics for the increasing numbers of Americans who consider themselves spiritual but not religious or spiritual and religious or none of the above and who no longer find traditional religious doctrines and institutions credible or matching their experience In nontechnical language it precisely and clearly traces how current brain mind research informs and enhances inner spiritual and religious experience and how scientific cosmology confirms spiritual intuitions From hunting gathering prehistory through city states empires and the great religions scientific methods advance exponentially faster into the future while the great spiritual insights have never been surpassed though often ignored or denied But scientific knowing and spiritual knowing share infinite reach Brain mind research contributes to understanding and living meditation and spiritual practices in silence ritual and vision Modern physics and mathematics demonstrate how humans observe and participate in the actual evolution of the universe Fractals in chaos theory are spiritual images of ultimate reality In creating loving and undifferentiated presence we find our own unique voice in the mystery of ultimate reality touching down here and now in the specifics of this present moment
