**The Politics of Linkage** Brian Bow, 2010-07-01 Do Canada and the United States share a special relationship or is this a mere myth that has masked stark calculations of national interest Recent tensions over the Iraq War and ballistic missile defence have resurrected this perennial Canadian debate and triggered alarm about whether the US would make coercive linkages between issues to force Canada to change its policies The Politics of Linkage cuts through political rhetoric and academic clichés by offering detailed accounts of postwar disputes over nuclear weapons Arctic waters oil and gas and the Iraq War Although early Cold War disputes were governed by a diplomatic culture that was genuinely special the limits of Canadian autonomy are now defined by the ever shifting alignment of interest groups in Washington and by international agreements and organizations **The Politics of Energy** G. Weinberg,1992-11-18 Blurb Contents Marvelous reading with few problems of the interaction between science technology and society left untouched One need not always agree but one cannot come away without a better education I found the parts on scientific administration and on the interaction of science and society excellent and provocative reading and the parts on energy and nuclear energy very much to the point American Journal of Physics Alvin Weinberg explores through these collected essays the ever troublesome relationship between science technology and society The title is taken from Weinberg s assertion that most of the issues arising at the intersection of science and society depend upon answers to questions that lie outside the power of science issues that are trans scientific Weinberg who during World War II helped develop the first nuclear reactors has much to say on the current role of nuclear power and the possibilities for the future Other topics include strategic defenses and arms control the role of the science administrator and the way in which time energy and resources are allocated to public problems In this remarkable record of a half century of public oriented work Weinberg lays the foundation for a philosophy of scientific administration parallel to the more established philosophy of science      Alberta Formed -
