The introduction of social media has given many communities the opportunity to connect and communicate with each other at a higher level than ever before. Many organizations from businesses to governments have taken advantage of this important tool to conduct research and enhance efficiency. Libraries and educational institutions have also made use of social media to enhance educational marketing, engage with learning communities, adapt educational tools, and more. The *Research Anthology on Applying Social Networking Strategies to Classrooms and Libraries* describes the applications, tools, and opportunities provided by the intersection of education and social media. It also considers the ways in which social media encourages learner engagement and community participation. Covering topics such as data collection, online professional learning networks, and reinforcement learning, this major reference work is a dynamic resource for pre-service teachers, teacher educators, faculty, and administrators of both K-12 and higher education, librarians, archivists, government officials, researchers, and academicians.

Handbook of Research in Second Language Teaching and Learning Eli Hinkel, 2016-11-18

Volume III of the *Handbook of Research in Second Language Teaching and Learning* like Volumes I and II is a comprehensive state-of-the-art overview of current research into social contexts of second language (L2) foreign language (FL) teaching and learning, language policy, curriculum types of instruction, incremental language skills such as listening, speaking, reading, writing, vocabulary, and grammar, international communication, pragmatics, assessment, and testing. It differs from earlier volumes in its main purpose to provide a more in-depth discussion and detailed focus on the development of the essential language skills required for any type of communication: speaking, listening, reading, vocabulary, grammar, and writing. Volume III preserves continuity with previous volumes in its coverage of all the classical areas of research in L2 FL teaching and learning and applied linguistics but rather than offering a historical review of disciplinary traditions, it explores innovations and new directions of research, acknowledges the enormous complexity of teaching and learning the essential language abilities, and offers a diversity of perspectives. Chapter authors are all leading authorities in their disciplinary areas.

What's new in Volume III: Updates the prominent areas of research including the sub-disciplines addressed in Volumes I and II and represents the disciplinary mainstays; Considers and discusses perspectives held by different schools of thought on the what, the how, and the why of teaching foundational language skills including theories, pedagogical principles, and their implementation in practice; Captures new and ongoing developments and trends in the key areas of L2 FL teaching and learning and innovative research topics that have gained substantial recognition in current publications including the role of corpora, technology, and digital literacy in L2 FL teaching and learning; Examines new trends in language pedagogy and research such as an increased societal emphasis on teaching academic language for schooling, somewhat contradictory definitions of literacy, and the growing needs for instruction in intercultural communication.
