Systems For All Agnes Kaposi, Margaret Myers, 2001-06-29 The need for a new approach to systems is now widely recognized in business and industry and numerous Systems courses have been introduced in universities This book offers a new systems paradigm presents a systems outlook defines key concepts and outlines the principles of characterizing complex systems in a qualitative way and by the systematic use of models and measures The book presents the Product process P p methodology a coherent collection of generic but readily understandable concepts rigorous but applicable methods and principles of reasoning This methodology assists in understanding any system and helps in the formulation and effective solution of complex problems regardless of the field in which they arise and irrespective of the specialist disciplines needed for supplying the solution Systems for All is aimed at three kinds of readers practising professionals managers administrators engineers and scientists whose job is to develop operate and manage complex systems students both undergraduate and postgraduate whose courses demand an integrated study of several disciplines members of the public who would wish to know what makes sophisticated systems tick and why some important systems fail A separate booklet containing guidelines for developing solutions to some selected exercises is available to instructors who wish to adopt the book for a lecture course

The Great Reading Disaster Mona McNeer, 2012-02-20 By the late 1980s half the nation's children were receiving eleven years of progressivist schooling that failed to give them even the elementary basis of education that was completed by the age of seven in earlier days This great reading disaster was caused by the look say method of teaching which presented whole words not individual letters This book explains the causes and provides the solution to this problem In 2006 the Secretary of State for Education and Skills has ordered schools to use the phonic method but there seems little evidence that its implications are properly understood or that any serious re training programme for teachers is being put in place The authors believe their explanations and recommendations in this book are thus needed just as much as ever Safety of Computer Control Systems 1985 (Safecomp '85) W. J. Quirk, 2016-06-03 Safety of Computer Control Systems 1985 Safecomp 85 Achieving Safe Real Time Computer Systems presents the proceedings of the Fourth IFAC Workshop held in Como Italy on October 1 3 1985 This book discusses a wide range of topics ranging from direct process control through robotics to operator assistance Organized into 28 chapters this compilation of papers begins with an overview of the implementation of atomic actions by means of concurrent programming constructs This text then examines the safety related applications that usually demand the provision of redundant resources within the system Other chapters consider the safe performance of an industrial robot system that relies on several factors This book discusses as well the increasing demand for Computer Assisted Decision Making CADM both in engineering and service industries The final chapter deals with the ways of reducing the effects of an error introduced during the design of a program This book is a valuable resource for software engineers
