Reading Comprehension Difficulties Cesare Cornoldi, Jane V. Oakhill, 2013-04-03 Recognizing the characteristics of children with learning disabilities and deciding how to help them is a problem faced by schools all over the world Although some disorders are fairly easily recognizable e.g. mental retardation or very specific to single components of performance and quite rare e.g. developmental dyscalculia schools must consider much larger populations of children with learning difficulties who cannot always be readily classified These children present high level learning difficulties that affect their performance on a variety of school tasks but the underlying problem is often their difficulty in understanding written text In many instances despite good intellectual abilities and a superficial ability to cope with written texts and to use language appropriately some children do not seem to grasp the most important elements or cannot find the pieces of information they are looking for Sometimes these difficulties are not immediately detected by the teacher in the early school years They may be hidden because the most obvious early indicators of reading progress in the teacher's eyes do not involve comprehension of written texts or because the first texts a child encounters are quite simple and reflect only the difficulty level of the oral messages sentences short stories etc with which the child is already familiar However as years go by and texts get more complex comprehension difficulties will become increasingly apparent and increasingly detrimental to effective school learning In turn studying assimilating new information and many other situations requiring text comprehension from problem

solving to reasoning with linguistic contents could be affected Problems with decoding dyslexia and language disorders have attracted more interest from researchers than have specific comprehension problems and have occupied more room in specialized journals Normal reading comprehension has also been a favorite with researchers However scarce interest has been paid to subjects who have comprehension difficulties This book is an attempt to remedy this situation In so doing this volume answers the following questions Does a reading comprehension problem exist in schools How important and widespread is the problem Is the problem specific How can a reading comprehension difficulty be defined and identified Does the syndrome have a single pattern or can different subtypes be identified What are the main characteristics associated with a reading comprehension difficulty When can other well identified problems add to our understanding of reading comprehension difficulties Which educational strategies are effective in preventing and treating reading comprehension difficulties What supplementary information can we get from an international perspective

Pick-me-up ,1896 Thinking and Learning through Children's Literature Miriam G. Martinez,Junko Yokota,Charles Temple,2017-04-18 Much of teachers attention these days is focused on having students read closely to ferret out the author s intended meaning and the devices used to convey that meaning But we cannot forget to guide students to have moving engagements with literature because they need to make strong personal connections to books of merit if they are to become the next generation of readers literate people with awareness of and concern for the diversity of human beings around them and in different times and places Fortunately guiding both students personal engagement with literature and their close reading to appreciate the author s message and craft are not incompatible goals This book enthusiastically and intelligently addresses both imperatives first surveying what is gained when students are immersed in literature then celebrating and explicating the main features of literature students need to understand to broaden their tastes and deepen their engagement at the same time they meet external standards then presenting a host of active methods for exploring all major genres of children s books and finally presenting suggestions for interdisciplinary teaching units grounded in literature Created by noted leaders in the fields of children s literature and literacy the book is enlivened by recurring features such as suggested reading lists issues for discussion links to technology and annotations of exemplary books
