Fluency and Reading Comprehension in Typical Readers and Dyslexics Readers Simone A. Capellini, Giseli D. Germano, 2018-02-22 Reading involves decoding and comprehension components and to become efficient it requires a large number of cognitive and linguistic processes Among those the phonological awareness the alphabetic principle the decoding the fluency the lexical development and the text comprehension development The reading comprehension is strongly related with the development of vocabulary oral language linguistic skills memory skills and ability to make inferences and the world experiences of each individual These processes become important only when the professional needs to deal with students presenting difficulties in learning how to read The difficulty using the knowledge of conversion rules between grapheme and phoneme to the word reading construction characterizes the dyslexia which is a specific learning disorder with a neurological source These difficulties presented by students with dyslexia interfere in their learning process impairing the learning development Knowing and following the reading development and its processes as well as obtaining the punctuation of fluency abilities and students comprehension allow us to understand what happens when the student presents difficulties to read This could help in the identification of learning disabilities and in the development of intervention programs

The Dyslexia Debate Julian G. Elliott, Elena L. Grigorenko, 2014-03-24 The Dyslexia Debate examines how we use the term dyslexia and questions its efficacy as a diagnosis While many believe that a diagnosis of

dyslexia will shed light on a reader's struggles and help identify the best form of intervention Julian G Elliott and Elena L Grigorenko show that it adds little value In fact our problematic interpretation of the term could prove to be a major disservice to many children with difficulties learning to read This book outlines in detail the diverse ways in which reading problems have been conceptualized and operationalized Elliott and Grigorenko consider the latest research in cognitive science genetics and neuroscience and the limitations of these fields in terms of professional action They then provide a more helpful scientifically rigorous way to describe the various types of reading difficulties and discuss empirically supported forms of intervention
