Blowing Clover, Falling Rain W. Travis Helms, 2020-11-06 The field of theopoetics explores the ways in which we make God present particularly through language This book explores questions of theopoetics as they relate to the central poetry of the American Sublime It offers a fresh theological engagement with what literary critic Harold Bloom terms the American religion transcendentalism Emerson's homespun mysticism Specifically it seeks to rehabilitate Emerson's concept of self reliance from the charge of gross egoism by situating it in the context of normative mysticisms Eastern and Western It undertakes a more poetic approach to reading theologically inflected poetry by exegeting four poets collectively constituting Bloom's American religious canon Ralph Waldo Emerson Walt Whitman Wallace Stevens and Hart Crane It utilizes a modified version of the ancient fourfold allegorical mode of reading Scripture to draw out theological dimensions of four quintessential texts Nature Song of Myself Sunday Morning Lachrymae Christi in order to offer a more imaginative way of reading imaginative writing Building on Emerson's contention just as there is creative writing there is creative reading and Bloom's claim a theory of poetry must be poetry before it can be of any use in interpreting poems it demonstrates the unique viable ways in which poems are able to do theology and perform or embody theopoetic truths

Paradigms and Perspectives on Value and Reality Chandana Chakrabarti, 2014-09-26 In Paradigms and Perspectives on Value and Reality one encounters a cross cultural and interdisciplinary approach to the study of timeless questions relating to the human condition In the book the reader will encounter the fundamental questions of what the nature of reality is how one can come to know this and what our moral obligations are as human beings The reader will learn from the collected insights of philosophy religion science and psychology and from diverse cultural perspectives both eastern and western in considering these universal human questions In living ethical lives one would like to know both how to act in order to act morally and also how it is that one could have insight into the foundations of morality The first question concerns the content of humans moral duties the second concerns the underlying basis for those duties In this text one encounters a pluralistic approach to examining both questions and learns much from the interaction between western and eastern methods of ethical inquiry Another vital aspect of human life that spans across time culture and tradition is curiosity about the world around us humans place in it and how it is that one might form a coherent picture of both Paradigms and Perspectives on Value and Reality explores this topic in depth and from a variety of cross cultural perspectives The volume concludes with a final section containing two essays devoted to the discussion of how religion and culture inform current theories of value and reality

A Theory of Literary Explication Kenneth B. Newell, 2011-07-12 This book presents current multidisciplinary research and theory from 17 different fields most of them never before applied to literary explication in order to provide 1 justification for the practice of a relative probability

type of explication as distinguished from interpretation 2 a relativistic foundation for the preference of some explications of a literary work over others and thereby 3 a middle way between the postmodern pluralist view that a work has only an unlimited number of equally acceptable though different explications and the modern intentionalist view that it has only one acceptable explication the author's Nine of the 17 fields are of primary relevance critical theory hermeneutics probability theory philosophy of science second order logic and four fields of cognitive science linguistics epistemology neuropsychology and artificial intelligence But the book also touches upon textual criticism legal theory measure theory fuzzy logic animal learning behavior developmental psychology evolutionary epistemology and neurobiology The book shows that those using a relative probability type of explication on a literary work can achieve consensus because the healthy adult human brain has an evolved uniform and probably innate ability to form relative probability judgments and to form them in the practice of activities like reading and explicating that are not uniform and innate Lastly the book contributes to the scholarly areas of explication theory and practice first by providing a relativistic foundation for a craft explication that currently is not acknowledged to have any foundation but nonetheless continues and will continue to be practiced and second by presenting a means relative epistemic probability by which judging some explications of a literary work to be more acceptable than others may be justified philosophically an uncommon circumstance in this postmodern era in which philosophical justification of many beliefs and practices is thought to be untenable An Introduction to the Theory of Knowledge Dan

O'Brien, 2006-11-20 An Introduction to the Theory of Knowledge guides the reader through the key issues and debates in contemporary epistemology Lucid comprehensive and accessible it is an ideal textbook for students who are new to the subject and for university undergraduates The book is divided into five parts Part I discusses the concept of knowledge and distinguishes between different types of knowledge Part II surveys the sources of knowledge considering both a priori and a posteriori knowledge Parts III and IV provide an in depth discussion of justification and scepticism The final part of the book examines our alleged knowledge of the past other minds morality and God O'Brien uses engaging examples throughout the book taking many from literature and the cinema He explains complex issues such as those concerning the private language argument non conceptual content and the new riddle of induction in a clear and accessible way This textbook is an invaluable guide to contemporary epistemology
