Abstract—The purpose of this study was to determine if there were differences in the prevalence of musculoskeletal disorders among different types of workers. The subjects included all employees of a large manufacturing company who had been employed for at least one year. A questionnaire was sent to each employee asking about symptoms of musculoskeletal disorders and work-related factors. The results showed that the prevalence of musculoskeletal disorders was higher among non-manual workers than manual workers. This finding suggests that non-manual workers may be more vulnerable to musculoskeletal disorders than manual workers.

originally published as a special issue of the European Journal of Developmental Psychology *Measures of Self-concept*
 Ruth C. Wylie, 1989-01-01 Ruth C Wylie's two volumes of *The Self Concept* published by Nebraska in 1974 and 1979
 evaluated psychological and sociological studies of self concept and self esteem Looking at a plethora of tests Wylie found in
 1974 that very few had been adequately conceived or implemented Many produced results that were unverifiable or specious
 Her findings had disturbing implications not only for the tests themselves but for substantive research based upon them In
 the 1980s psychometric tests of self concept have continued to proliferate Wylie has continued to assess them *Measures of*
Self Concept briefly summarizes the psychometric criteria for self concept tests as fully discussed in Wylie's 1974 book and
 the present general state of methodological adequacy of currently used earlier tests and some promising new ones still under
 development Although Wylie still finds serious shortcomings she notes a greater attempt today to increase and evaluate the
 validity of self concept indices This book presents detailed up to date information about and psychometric evaluations of ten
 self concept tests that appear to be the most meritorious candidates for current use and for further research and
 development It is the first book since her 1974 volume to review specific as well as general measures of self esteem for a
 range of ages from preschool to adult *Readings in Artificial Intelligence and Databases* John Mylopoulos, Michael L.
 Brodie, 2014-06-28 The interaction of database and AI technologies is crucial to such applications as data mining active
 databases and knowledge based expert systems This volume collects the primary readings on the interactions actual and
 potential between these two fields The editors have chosen articles to balance significant early research and the best and
 most comprehensive articles from the 1980s An in depth introduction discusses basic research motivations giving a survey of
 the history concepts and terminology of the interaction Major themes approaches and results open issues and future
 directions are all discussed including the results of a major survey conducted by the editors of current work in industry and
 research labs Thirteen sections follow each with a short introduction Topics examined include semantic data models with
 emphasis on conceptual modeling techniques for databases and information systems and the integration of data model
 concepts in high level data languages definition and maintenance of integrity constraints in databases and knowledge bases
 natural language front ends object oriented database management systems implementation issues such as concurrency
