second home Generation Robot Terri Favro, 2018-02-06 *Generation Robot* covers a century of science fiction fact and speculation from the 1950 publication of Isaac Asimov's seminal robot masterpiece *I Robot* to the 2050 Singularity when artificial and human intelligence are predicted to merge. Beginning with a childhood informed by pop culture robots in movies in comic books and on TV in the 1960s to adulthood where the possibilities of self-driving cars and virtual reality are daily conversation, Terri Favro offers a unique perspective on how our relationship with robotics and futuristic technologies has shifted over time. Peppered with pop culture fun facts about Superman's kryptonite, the human-machine relationships in the cult TV show *Firefly* and the sexual and moral implications of the film *Ex Machina*, *Generation Robot* explores how the techno-triumphs and resulting anxieties of reality bleed into the fantasies of our collective culture. Clever and accessible, *Generation Robot* isn't just for the serious scientific reader; it's for everyone interested in robotics and technology since their science-fiction origins. By looking back at the future she once imagined, analyzing the plugged-in present and speculating on what is on the horizon, Terri Favro allows readers the chance to consider what was, what is, and what could be. This is a captivating book that looks at the pop culture of our society to explain how the world works now and tomorrow. Hominin Neil R

McAdam, 2025-02-28 A story that spans five thousand years, *Telikus* stumbles out of the desert and leads a Stone Age community into an uncertain future. Two brothers trying to avert the first war fight with swords and shields reminiscent of Mycenae from Earth's antiquity. A farmer stands up at an assembly like ancient Athens and starts a revolution. A brother and sister must uncover the secrets of a dead aunt to avert a nuclear war. All the time, a Super Intelligence dormant on an ancient space relic awaits the first Hominin to enter the bridge. It starts with a naked man walking out of the desert with no memory.

Comics & Culture Anne Magnussen, Hans-Christian Christiansen, 2000 Comics have become important elements in the culture of the 20th century; not only has the genre been recognized as a medium and an art form in its own right, it has also inspired other means of communication from text books to interactive media. In 13 articles, *Comics and Culture* offers an introduction to the field of comics research written by scholars from Europe and the USA. The articles span a great variety of approaches including general discussions of the aesthetics and definition of comics, comparisons of comics with other media, analyses of specific comics and genres, and discussions of the cultural status of comics in society. One way to characterize this book is to focus on the contributors: Recognized and established research with important publications to their credit from one group: Donald Ault, Thierry Groensteen, M. Thomas Inge, Pascal Lefvre, and Roger Sabin. Another group is from the new generation of researchers represented by PhD students: Hans-Christian Christiansen. *Solomon's Oak* Jo-Ann
