insistent in early modern drama that it becomes a structural metaphor It addresses both plays and masques across the period arguing that the ways of seeing in these different kinds of theatre make apes mean differently in their generic contexts Grounded in historicist readings this book also draws significantly on the field of ritual studies and the new intersectional discipline of animal performance studies

redistricting in California which has now become one of the most left leaning states and is considered a harbinger of political trends in the United States Ultimately this is a book that looks forward by looking backward at the tug and pull of redistricting efforts aimed at ensuring greater equality in a racially diverse democracy and asks What is the role played by race and partisanship in the voting rights revolution How does that vary far from the traditional flashpoints of American race relations What does that tell us about the redefinition of political representation in the past half century And most crucially what does it foretell for the next half century
