Lost Bombs:

The Day We Lost the H-Bomb Barbara Moran, 2009-04-28 In *The Day We Lost the H Bomb* science writer Barbara Moran marshals a wealth of new information and recently declassified material to give the definitive account of the Cold War's biggest nuclear weapons disaster On January 17 1966 a U S Air Force B 52 bomber exploded over the sleepy Spanish farming village of Palomares during a routine airborne refueling The explosion killed seven airmen and scattered the bomber's payload four unarmed thermonuclear bombs across miles of coastline Three of the rogue H bombs were recovered quickly Tracking down the fourth required the largest search and salvage operation in U S military history Moran traces the roots of the Palomares incident giving a brief yet in depth history of the Strategic Air Command and its eccentric larger than life commander General Curtis LeMay whose massive deterrence strategy kept armed U S bombers aloft at all times Back on the ground Moran recounts the myriad social and environmental effects of an accident that spread radioactive debris over hundreds of acres of Spanish farmland alarmed America's strategic allies and damaged Spanish American diplomatic relations As the American military floundered in its attempt to keep the story secret the events in Spain sometimes took on farcical overtones Constant global media hype was fueled by the hit James Bond movie *Thunderball* with its plot about an atomic weapon lost at sea In addition there were the unwanted attentions of a rusty hulled Soviet surveillance ship and even awkward public relations stunts complete with American diplomats in swim trunks *The Day We Lost the H Bomb* is a singular work of military history that effortlessly and dramatically captures Cold War hysteria high stakes negotiations and the race to clean up a disaster of unprecedented scope At once epic and intimate this book recounts in stunning detail the fragile peace Americans had made with nuclear weapons and how the specter of imminent doom forced the United States to consider not only what had happened over Palomares but what could have happened This forgotten chapter of Cold War history will grip readers with the tension of that time and reawaken the fears and hopes of that dangerous era **Lost Nuke** Dirk

Septer, 2016 A story seemingly drawn out of a Hollywood action script Gripping stuff Canada's History Just before midnight on February 13 1950 three engines of a US Air Force B 36 intercontinental bomber caught fire over Canada's northwest coast The crew jumped and the plane ditched somewhere in the Pacific Ocean Almost four years later the wreck of the bomber was found accidentally in a remote location in the coastal mountains of British Columbia three hours flying time in the opposite direction of where it was supposed to have crashed After years of silence the United States finally admitted to losing its very first nuclear bomb the incident was its first Broken Arrow the code name for accidents involving nuclear weapons But was the bomb dropped and exploded over the Inside Passage or was it blown up at the aircraft's resting place in the mountains This Cold War era tale follows the last flight of bomber 075 and attempts to unravel the real story behind more than fifty years of secrecy misdirection and misinformation **Meeting SECURE** Daniel M Yulo, 2023-04-18 *Meeting SECURE* Someone is killing dolphins the crew of a salvage ship is found murdered after a mysterious object is salvaged from

15 Minutes L. Douglas Keeney,2011-02-01 Packed with startling revelations this inside look at the secret side of the Cold War exposes just how close America came to total annihilation During the Cold War a flight crew had 15 minutes to get their nuke laden plane in the air from the moment Soviet bombers were detected 15 minutes between the earliest warning of an incoming nuclear strike and the first flash of an enemy warhead This is the chilling true story of the incredibly risky steps our military took to protect us from that scenario including Over two thousand loaded bombers that crossed American skies They sometimes crashed and at least nine times resulted in nuclear weapons being accidentally dropped A system that would use timers and rockets to launch missiles even after everyone was dead Disastrous atmospheric nuclear testing including the horrific runaway bomb that fooled scientists and put thousands of men in uniform in the center of a cloud of hot fallout A plan to use dry lake beds to rebuild and launch a fighting force in the aftermath of nuclear war Based on formerly classified documents military records press accounts interviews and over 10 years of research 15 Minutes is one of the most important works on the atom bomb ever written
