idea Paradox Lost Michael Huemer, 2018-06-28 Paradox Lost covers ten of philosophy's most fascinating paradoxes in which seemingly compelling reasoning leads to absurd conclusions. The following paradoxes are included: The Liar Paradox in which a sentence says of itself that it is false; Is the sentence true or false? The Sorites Paradox in which we imagine removing grains of sand one at a time from a heap of sand; Is there a particular grain whose removal converts the heap to a non-heap? The Puzzle of the Self-Torturer in which a series of seemingly rational choices has us accepting a life of excruciating pain in exchange for millions of dollars; Newcomb's Problem in which we seemingly maximize our expected profit by taking an unknown sum of money rather than taking the same sum plus 1000; The Surprise Quiz Paradox in which a professor finds that it is impossible to give a surprise quiz on any particular day of the week but also that if this is so then a surprise quiz can be given on any day; The Two Envelope Paradox in which we are asked to choose between two indistinguishable envelopes and it is seemingly shown that each envelope is preferable to the other; The Ravens Paradox in which observing a purple shoe provides evidence that all ravens are black; The Shooting Room Paradox in which a deadly game kills 90% of all who play yet each individual's survival turns on the flip of a fair coin. Each paradox is clearly described, common mistakes are explored, and a clear logical solution offered. Paradox Lost will appeal to professional philosophers, students of philosophy, and all who love intellectual puzzles.
