other planet where life exists other than on Earth Life started out in a most simple form then proceeded along a labyrinth of evolutionary pathways that resulted in extraordinary and unfathomable designs This is a journey from the beginning of time to this very day guided by circumstances contingencies and chaos that has governed Earth s living assemblage But life s presence was not destined to just happen If it wasn t for our moon which gave Earth orbital and rotational stability life would not be as we know it today If it wasn t for volcanic eruptions Earth would be an ice clad frozen globe If it wasn t for one of the tiniest of living organisms that produced a toxic gas complex life would not have arisen If it wasn t for one particular extinction event Homo sapiens would not be walking this planet and you would not be reading this now If it wasn t for a million other things life would be much different or not at all Earth made life from the meek to the monstrous from the banal to the bizarre from the humblest to the haughtiest Strap yourself in alongside a window seat and witness the passing of time to view the episodes of change and how the making of life became the greatest story on Earth Special Scientific Report
