## **Macromolecular Solutions Solvent Property Relationships In Polymers:**

**Macromolecular Solutions** Raymond B. Seymour, G. Allan Stahl, 2013-10-22 *Macromolecular Solutions Solvent Property Relationships in Polymers* is a collection of papers presented at a symposium on Macromolecular Solutions held New York City on August 23-28 1981 sponsored by the American Chemical Society at its 182nd national meeting. This book is composed of 19 chapters and begins with discussions on the concept, application and analysis of solubility parameters of polymers. The succeeding chapters deal with the role of solubility parameters in polymer coating design and stress cracking of nylon. Considerable chapters are devoted to the preparation, properties, reactions and analysis of various polymers and copolymers. These topics are followed by surveys of the polymer-surfactant interaction, effect on polymer solution properties and the effects of methanol-gasoline mixtures on elastomers. The final chapters describe the residual solvent content effect on dissolution kinetics of polymers, the application of excimer fluorescence to measure polymer-solvent interactions and a general procedure for the calculation of thermodynamic properties of polymer solutions. This book will be of great value to polymer chemists, manufacturers and researchers.
