Office for Subject Cataloging Policy, 1994 Inside the "Knowledge Factory" Heinke Röbbken, 2013-06-29 Higher education institutions have proven to be one of the most enduring organizations of the last centuries. In recent decades, however, significant changes in their institutional environment have forced universities to rethink their strategies. This is particularly true for management higher education institutions. How do universities and specifically business schools deal with these various expectations? Are there different organizational responses in the American, German, or Swedish higher education systems? These and other important questions of higher education management research are examined in this doctoral thesis. Taking neo-institutionalism theory as its basis, the thesis is convincing both conceptually as well as empirically through its multiple case study design. The insights gained are most interesting. They reveal how a form of organizational schizophrenia can help institutions comply with external demands without compromising the pursuit of academic reputation, which is essential for the inner stability of higher education institutions and their continued existence. This book is relevant both for students and researchers in higher education management as well as management practitioners and administrators. I can say this with conviction as Heinke Röbbken's doctoral thesis was one of the last that I supervised as a teacher before changing to the president's office of the University of Oldenburg. As such, I read it both from a theoretical viewpoint as well as that of a practitioner The Star Factory Ciaran Carson, 1998 One of Ireland's most celebrated writers, musicians, and poets, Ciaran Carson was born in Belfast and has spent his life there. In *The Star Factory*, he makes himself the cartographer of his home city's spaces, symbolic and literal, the scribe of its byways and avenues, from Abbey Road to Zetland Street. Belfast has seen transformation: once the fifth greatest industrial city in the world, the home of the S.S. Titanic, it has more recently been a battleground of sectarian slaughter. To conjure up the lives lived there, Carson plunges down the wormhole of memory, admiring along the way the strata and roots beneath the surface. Though it has experienced more than its share of urban decay, the *Star Factory* of the title is an abandoned mill. Carson's Belfast teems with stories, stories that can spring from a telephone directory, a cigarette case, a postcard, a book about tramways, a stamp A Savage Factory Robert J. Dewar, 2009 *A Savage Factory* is a true memoir straight from the factory floor of an automotive giant losing the global auto war to smaller, weaker, less experienced foreign competitors that beat us at our own game on our own turf. It gives an inside look up close at incompetent management at war with the labor force that created a quality nightmare and caused the car-buying public to lose trust and faith in American cars. It is a true story of the inner workings of Ford's largest automatic transmission plant, the people, the machines, and the never-ending war between management and labor that produced low-quality cars that opened the door for foreign competitors to come to our country and take our auto market. It gives real-life examples of the battlefield-like conditions in the auto plants that caused alcoholism, drug addiction, sexual harassment, and family breakdown while producing transmissions.

that received the largest recall in automotive history and would have caused Ford Motor Company to go bankrupt had the Federal Government not intervened **Factory and Industrial Management** John Robertson Dunlap, Arthur Van Vlissingen, John M. Carmody, 1912 **Spann's Guide to Gibson 1902-1941** Joseph E. Spann, 2011 Reference Centerstream presents this detailed look at the inner workings of the famous musical instrument manufacturer of Kalamazoo Michigan before World War II For the first time Gibson fans can learn about the employees who built the instruments exactly where the raw materials came from the identity of parts vendors and how the production was carried out The book explains Gibson's pre World War II factory order number and serial number systems and corrects longstanding chronological errors Previously unknown information about every aspect of the operation is covered in depth Noted historian Joe Spann gathered firsthand info from pre war employees and had access to major Gibson document collections around the world Long time Gibson experts as well as casual collectors will find this volume an indispensable addition to their reference shelf
