

Competencies for the Nurse Practitioner Working with Adult Urology Patients

Susanne A. Quallich, Sherry M. Bumpus, and Shelley Lajiness

It is widely recognized that with the aging population in the United States there is a growing need for urologic care that exceeds the capacity of presently available urologists (American Urological Association [AUA], 2014). Nurse practitioners (NPs) are ideally situated to fill this mounting need that has been created, in part, by changes in resident training programs and funding for graduate medical education. In response to this need, the AUA (2014) has published a consensus statement on the role of advanced practice providers (APPs) (NPs and physician assistants) within the specialty. However, the only urology competencies that exist are from the Milestones project for assessing and evaluating resident physicians, and are not constructed for NP practice (see Table 1) (Accreditation Council for Graduate Medical Education [ACGME] & the American Board of Urology, 2012).

Susanne A. Quallich, ANP-BC, NP-C, CUNP, FAANP, is an Andrology Nurse Practitioner, Department of Urology, University of Michigan Health System, Ann Arbor, MI.

Sherry M. Bumpus, PhD, RN, FNP-BC, Assistant Professor and Family Nurse Practitioner, Eastern Michigan University, Ypsilanti, MI.

Shelley Lajiness, MSN, FNP-BC, Nurse Practitioner, Departments of Urology and Infectious Disease, Beaumont Health System, Royal Oak, MI.

Acknowledgement: The authors wish to thank Michelle McGarry, MSN, CPNP, CUNP, for her support and input.

Quallich, S.A., Bumpus, S.M., & Lajiness, S. (2015). Competencies for the nurse practitioner working with adult urology patients. *Urologic Nursing*, 35(5), 221-230. doi:10.7257/1053-816X.2015.35.5.221

The role of the nurse practitioner (NP) has expanded into specialty domains. This document proposes 24 competencies specific to the urology NP, which are also consistent with the recommendations of National Organization of Nurse Practitioner Faculties (NONPF) and complement the American Urologic Association (AUA) 2014 white paper on the incorporation of advanced practice providers in urology practices. It describes three levels of practice and experience progression for the urology NP working with adult patients, independent of specific clinical setting. These urology-specific competencies supplement and complement the core competencies and population-focused competencies of generalist nurse practitioners.

Key Words: Nurse practitioner role, advanced practice providers, advanced practice registered nurse (APRN) consensus model, American Urological Association [AUA].

Objectives:

1. Discuss the urology-specific competencies for urology nurse practitioners that supplement and complement the core competencies and population-focused competencies of generalist nurse practitioners.
2. Explain the three levels of practice and experience progression for the urology NP working with adult patients set forth by accrediting organizations.

This increasing demand for urology services in the U.S. and the decline in available urologists, combined with restrictions on resident work hours and changes to primary care training requirements at a time of decreasing reimbursement for graduate medical education, have created an opportunity for NPs. The Institute of Medicine (IOM) (2010) supports NP expansion to specialty services. However, this movement is happening without formal didactic education within NP programs, which has been cited as a barrier to practice

(Albaugh, 2012), as well as to assessing and evaluating the urology NP.

A growing body of literature supports the high-quality, cost-effective, patient-centered care that NPs provide (Newhouse et al., 2011). According to the American Association of Nurse Practitioners (AANP) (2015), NPs are becoming the health care provider of choice for millions of Americans, including specialty populations. NPs are now practicing in a number of sub-specialty areas, from allergy and immunology to urology; in 2012, there
