violins made by the old masters Confirmatory chemical tests will be suggested it should be comparatively simple especially through modern micro analytical methods to determine the presence of certain constituents in the varnish The subject matter of this book will of necessity become technical especially when the theoretical aspects are considered It is realized that not everyone who will be interested in the rediscovery of the old Italian varnish will also be interested in the scientific deductions and conclusions For this reason a chapter will be included in which the preparation of the materials from which the varnish is made the formulation of the varnish and its application will be reduced to the simplest terms The old masters who lived several hundred years ago and who possessed none of the advantages of modern technology also used only the simplest technique in varnishing and finishing their violins
