

Biomimicry – Bionic – Biomimetics

Humans have been learning from nature
For a long time but only recently gave this practice a name.

Biomimetics – Otto Schmitt coined the term in writing about
his efforts to design a trigger based on the nerve cell of a
squid in the 50's.

Bionics – 1958 – goal to understand nature's principles and
use them as stimuli for innovation (then came the Bionic Man

Understanding Heinz von Foerster,2007-05-08

In these essays Heinz von Foerster discusses some of the fundamental principles that govern how we know the world and how we process the information from which we derive that knowledge

Included are path breaking articles concerning the principles of computation in neural nets

1967 the definition of self organizing systems

1960 the nature of cognition

1970 as well as recent expansions on these themes e g How recursive is communication

1993 Working with Norbert Wiener Warren McCullough and others in the 1960s and 1970s von Foerster was one of the founders of the science of cybernetics which has had profound effects both on modern systems theory and on the philosophy of cognition
