Reason and Democracy Thomas A. Spragens, 1990-07-20 Reason and Democracy breaks new ground in providing a plausible philosophical basis for the communitarian view of a healthy democracy as the rational pursuit of common purposes by free and equal citizens Thomas A Spragens Jr argues that the most persistent paradigms of Western political rationality originated in classical philosophy took their modern expression in the philosophies of Kant and Mill and terminated in Max Weber s pairing of purely technical rationality with arbitrary ends Drawing on recent work in the philosophy of science and the philosophy of language combined with appropriate analogies in political thought and action Spragens maintains that it is possible to discern the outlines of a philosophically cogent and morally beneficial concept of rational practice on the part of a political community This possibility he contends provides a philosophical basis for liberal democratic politics that is superior to utilitarian and deontological accounts

To Teach, To Delight, and To Move David S. Cunningham, 2004-10-22 This book initiates a new conversation about how theological education might be re envisioned for the twenty first century church The prevailing curricular structure in today s seminaries and divinity schools was fashioned in a very different era one that assumed the continued cultural dominance of Christianity and the continued academic dominance of the canons of Enlightenment reason Neither assumption is viable in today s post Christian world hence our new circumstances demand a new vision for theological education The authors of this volume offer an important resource for this project through their creative appropriation of the classical rhetorical tradition particularly as it has been rehabilitated in the contemporary context Like St Augustine they believe that the chief goals of Christian theology are similar to those of classical rhetoric to teach to delight and to move And the authors are united in their conviction that these must also be the goals of theological education in a post Christian era This volume arises out of a passionate commitment to the cause of theological education

The authors hail from a wide range of denominational traditions and have taught in numerous seminaries and divinity schools. They have also studied the classical and postmodern rhetorical traditions in both theory and practice. They met as a group on numerous occasions to read one another's contributions to the volume and to offer guidance for the process of rewriting. As a result, this book is much more than a mere collection of essays; it is a jointly authored work and one which presents an integrated vision for the future of theological education.

From Accelerated Accumulation to Socialist Market Economy in China Kjeld Erik Brodsgaard, Koen Rutten, 2017-04-03. In *From Accelerated Accumulation to Socialist Market Economy in China*, Kjeld Erik Brodsgaard and Koen Rutten examine China's indigenous economic discourse and its relation to both economic policy making and the overall trajectory of development from the First Five Year Plan in 1953 to 2016. In so doing, this volume demonstrates that although the form of the current economic system and its theoretical underpinnings bear scant resemblance to those of the planned economy, economic policy making still relies on the principle of accelerated accumulation which lay at the heart of the economic development project in the early years of the People's Republic.

Reason and the Search for Knowledge D. Shapere, 2012-12-06 An impressive characteristic of Dudley Shapere's studies in the philosophy of the sciences has been his dogged reasonableness He sorts things out with logical care and mastery of the materials and with an epistemological curiosity for the historical happenings which is both critical and respectful Science changes and the philosopher had better not link philosophical standards too tightly to either the latest orthodox or the provocative up start in scientific fashions and yet as critic the philosopher must not only master the sciences but also explicate their meanings not those of a cognitive never never land Neither dreamer nor pedant Professor Shapere has been able to practice the modern empiricist's exercises with the sober and stimulating results shown in this volume he sees that he can be faithful to philosophical analysis engage in the boldest rational reconstruction of theories and experimental measurements and faithful too empirically faithful we may say to both the direct super highways and the winding pathways of conceptual evolutions and metaphysical revolutions Not least Shapere listens To Einstein and Galileo of course but to the workings of the engineers and the scientific apprentices too and to the various philosophers now and of old who have also worked to make sense of what has been learned and how that has happened and where we might go wrong

Economic Integration and Economic Strategy

F. Kozma, 2013-11-11 It was in 1967-68 that I wrote the book *Economic relations between the two Europes and the socialist international cooperation* published in 1970 Its main message may be summed up as follows 1 Between economic development and underdevelopment exists a state which stabilizes under capitalist economic and world economic relations and constitutes a particular peripheral zone around the developed cores of the world economy It is a historic feat of the European socialist countries to have broken out of this peripheral situation and to move towards the complete liquidation of their historical backwardness 2 The position of the group of European socialist countries in world economy and within it in Europe is determined by the asymmetry which is at the same time the most characteristic feature of their domestic development namely that the traditional extent and manner of their participation in the international division of labour no longer corresponds to their development requirements their having become much more developed and exacting At the same time their full participation in the division of labour of the highly developed countries is still hindered beyond the deliberate and spontaneous repressive efforts of the West by the fact that their forces of production have not yet reached an advanced state This is what makes East-West economic relationships even more contradictory and constitutes a menace to every effort made in this direction 3

Economic Anthropology

Chris Hann, Keith Hart, 2011-03-28 This book is a new introduction to the history and practice of economic anthropology by two leading authors in the field They show that anthropologists have contributed to understanding the three great questions of modern economic history development socialism and one world capitalism In doing so they connect economic anthropology to its roots in Western philosophy social theory and world history Up to the Second World War anthropologists tried and failed to interest economists in their exotic findings They then launched a vigorous debate over whether an approach taken from economics was appropriate to the study of non-industrial economies Since the 1970s they have developed a critique of capitalism based on studying it at home as well as abroad The authors aim to rejuvenate economic anthropology as a humanistic project at a time when the global financial crisis has undermined confidence in free market economics They argue for the continued relevance of predecessors such as Marcel Mauss and Karl Polanyi while offering an incisive review of recent work in this field *Economic Anthropology* is an excellent introduction for social science students at all levels and it presents general readers with a challenging perspective on the world economy today Selected by Choice as a 2013 Outstanding Academic Title
