## **Rationality study Of Religion:**

**Rationality and the Study of Religion** Jeppe Sinding Jensen, Luther Martin, 2013-09-13 Does rationality the intellectual bedrock of all science apply to the study of religion Religion arguably the most subjective area of human behaviour has particular challenges associated with its study Attracting crowd healers conjurers the pious and the prophetic alongside comparativists and sceptics it excites opinions and generalizations whilst seldom explicitly staking out the territory for the discussions in which it partakes Increasingly scholars argue that religious study needs to define and critique its own field and to distinguish itself from theology and other non objective disciplines Yet how can rational techniques be applied to beliefs and states of mind regarded by some as beyond the scope of human reason Can these be made empirically testable or comparable and replicable within academic communities Can science explicate religion without reducing it to mere superstition or redefine its truth in some empirical but meaningful way Featuring contributions from leading international experts including Donald Wiebe Roger Trigg and Michael Pye Rationality and the Study of Religion gets under the surface of the religious studies discipline to expose the ideologies beneath Reopening debate in a neglected yet philosophically significant field it questions the role of rationality in religious anthropology natural history and anti scientific theologies with implications not only for supposedly objective disciplines but for our deepest attitudes to personal experience Interesting and important Religion has long been associated with irrationality both by its defenders and its critics and the topic of rationality has been unjustly neglected The book certainly deserves to be widely circulated Greg Alles Western Maryland College

Chin, 2017-03-23 This book evaluates the common criticism that Christianity in Asia is westernized Since the 1980s Asian evangelical theologians and missiologists argue that the intrusion of Western theology is responsible for the Western and hence alien expressions of Christianity in Asia Yet in Singapore the number of Christians has increased over the last few decades Empirical evidence demonstrates that younger Chinese Singaporeans convert from Buddhism or Taoism to Christianity partly because they perceive it as a rational religion over Buddhism or Taoism which are viewed as irrational or superstitious Not only do many converts favor Christianity as a rational religion but they do not regard Christianity as a Western religion at the point of their conversion What accounts for those recent developments This study explores the processes of modernization and globalization as important factors impacting religious change in Singapore Personal contextual and structural elements actually influence one's religion of choice In facilitating effective mission one must qualify the use of the categories Asian and Western because religious and cultural boundaries overlap What matters most in missiology is discerning how the gospel of Jesus Christ engages the self understanding and lived realities of ethnic and religious others in diverse cultural settings

**Patterns of Rationality** Tommaso Bertolotti, 2015-04-29 This book proposes an applied epistemological framework for investigating science social cognition and religious thinking based on inferential patterns that recur in the different domains It presents human rationality as a tool that allows us to make sense of our physical or social surroundings It shows that the resulting cognitive activity produces a broad spectrum of outputs such as scientific models and experimentation gossip and social networks but also ancient and contemporary deities The book consists of three parts the first of which addresses scientific modeling and experimentation and their application to the analysis of scientific rationality Thus this part continues the tradition of eco cognitive epistemology and abduction studies The second part deals with the relationship between social cognition and cognitive niche construction i e the evolutionarily relevant externalization of knowledge onto the environment while the third part focuses on what is commonly defined as irrational thus being in a way dialectically opposed to the first part Here the author demonstrates that the irrational can be analyzed by applying the same epistemological approach used to study scientific rationality and social cognition also in this case we see the emergence of patterns of rationality that regulate the relationships between agents and their environment All in all the book offers a coherent and unitary account of human rationality providing a basis for new conceptual connections and theoretical speculations

**Is Faith Rational?** Wessel Stoker,2006 Is faith rational Some respond by providing proofs for God s existence Others hold that no reasons for the Christian faith can be given This book discusses different ways of accounting for faith i e classical apologetics the transcendental view that faith is part of human nature and the view that argues for the rationality of faith on the basis of direct perceptions of God that appear to be objective The author subsequently proposes a rational accounting for the Christian faith in our secularized and religiously pluralistic society His starting point is the lasting religious experience of believers in everyday life He also discusses the question of how this accounting for faith can function in a world of both secular worldviews and other religions Religious experience is not subjective or arbitrary but rational In these experiences human beings are involved with God Religious experience can be described phenomenologically as an experience that transcends our capacities God reveals himself to people primarily in narratives Narratives have a rational structure and the Gospel narratives provide in narrative form arguments for faith The assent to faith involves the whole person and stamps his life story and conduct Assent to faith is thus affective but that does not exclude its being rational The positive reason for faith lies in experience itself There are no reasons for faith outside the faith itself but this does not mean that there are no points of contact in human existence for the Christian faith

**Rationality and Religion** Roger Trigg,1998-06-08 Rationality and Religion deals with the perennial question of how far religious faith needs reason

**Rationality and Religious Theism** Joshua L. Golding,2017-11-22 Throughout the ages one of the central topics in philosophy of religion has been the rationality of theistic belief This book proposes that parties on both sides of this debate might shift their attention in a different direction by focusing on the question of whether it is rational to be a religious theist Explaining that having theistic beliefs is primarily a cognitive affair but being a religious theist involves a whole way of life that includes one s beliefs Golding argues that it can be pragmatically rational to be a religious theist even if the evidence for God s existence is minimal The argument is applied to the case of Judaism articulating what is involved in religious Judaism and arguing that it is rationally defensible to be a religious Jew The book concludes with a discussion of whether a similar argument might be constructed for other versions of religious theism such as Christianity or Islam and for non theistic religions such as Taoism or Buddhism Joshua Golding offers a carefully wrought explanation of how it can be rational for someone to live a religious life in particular but not necessarily only a traditional Jewish life
