comprehend the traumatic significance of Hiroshima in order to construct a new theory of history

Values and Music Education Estelle R. Jorgensen,2021-11-09 What values should form the foundation of music education And once we decide on those values how do we ensure we are acting on them In Values and Music Education esteemed author Estelle R Jorgensen explores how values apply to the practice of music education We may declare values but they can be hard to see in action Jorgensen examines nine quartets of related values and offers readers a roadmap for thinking constructively and critically about the values they hold In doing so she takes a broad view of both music and education while drawing on a wide sweep of multidisciplinary literature Not only does Jorgensen demonstrate an analytical and dialectical philosophical approach to examining values but she also seeks to show how theoretical and practical issues are interconnected An important addition to the field of music education Values and Music Education highlights values that have been forgotten or marginalized underscores those that seem perennial and illustrates how values can be double edged swords

The Reception of Northrop Frye ,2021-08-31 The widespread opinion is that Northrop Frye s influence reached its zenith in the 1960s and 1970s after which point he became obsolete his work buried in obscurity This almost universal opinion is summed up in Terry Eagleton s 1983 rhetorical question Who now reads Frye In *The Reception of Northrop Frye* Robert D Denham catalogues what has been written about Frye books articles translations dissertations and theses and reviews in order to demonstrate that the attention Frye s work has received from the beginning has progressed at a geomantic rate Denham also explores what we can discover once we have a fairly complete record of Frye s reception in front of us such as Hayden White s theory of emplotments applied to historical writing and Byron Alm n s theory of musical narrative The sheer quantity of what has been written about Frye reveals that the only valid response to Eagleton s rhetorical question is a very large and growing number the growth being not incremental but exponential

relationship between literature and the Christian faith This anthology covers all of the major topics that fall within this subject and includes essays and excerpts from fifty authors including C S Lewis Flannery O Connor Dorothy Sayers and Frederick Buechner

A Case for Teaching Literature in the Secondary School Janet Alsup, 2015-04-17 Taking a close look at the forces that affect English education in schools at the ways literature cognitive science the privileging of the STEM disciplines and current educational policies are connected this timely book counters with a strong argument for the importance of continuing to teach literature in middle and secondary classrooms The case is made through critical examination of the ongoing culture wars between the humanities and the sciences recent research in cognitive literary studies demonstrating the power of narrative reading and an analysis of educational trends that have marginalized literature teaching in the U S including standards based and scripted curricula The book is distinctive in presenting both a synthesis of arguments for literary study in the middle and high school and sample lesson plans from practicing teachers exemplifying how literature can positively influence adolescents intellectual emotional and social selves

The Use of Children's Literature in Teaching Alyson Simpson, 2016-03-22 The Use of Children s Literature in Teaching reveals the impact of politics professional guidelines and restrictive measurements of literacy on the emerging identities of young teachers It places renewed emphasis on the importance of creative teaching with children s literature for the empowerment of teacher agency to enhance the learning of their students Framing the debate alongside the issue of teacher autonomy Simpson describes results from a two year study which brings together information from interviews surveys document analysis and digital stories from Australia Canada the UK and the US to assess the role of children s literature in pre service teacher education Through cross cultural comparison this research captures the different levels of connection between politics education systems higher education and pre service teachers It exposes how politics narrow views of professionalism and program structures in teacher education may adversely

affect the development of pre service teachers This book presents a strong case that reading and responding critically to literary texts leads to better educational outcomes than basic decoding and low level comprehension training As such this book will be of great interest to researchers and scholars working in the areas of teacher education and literacy and primary education It should also be essential reading for teacher educators and policymakers

The Principles and Practice of Common-school Education James Currie,1884 Challenges Bequeathed ,2009-01-01 In this thoughtful and provocative collection of essays a group of scholars from varied backgrounds and interests have each taken up the educational challenges bequeathed by Dwayne Huebner in his 1996 essay Challenges Bequeathed Huebner encouraged educators to surpass the technical foundations of education affirm the significance of the imagination use the world s intellectual traditions and achievements engage in public discourse about education and speak out for children and youth Each author has extended and in some ways transcended the discussion of these five challenges yet still draw upon the considerable contribution Dwayne Huebner has made to the field of education The writers in this volume grapple with the complexities of teaching and learning as always in process and as always relational of schools as sites of creative and imaginative acts of knowing and being The book begins with Huebner s 1996 essay wherein he delineates the challenges for educators as he perceived them Readers are invited to begin with this chapter However after taking in Professor Huebner s prescience his ability to see years in advance of everyone else what is deeply at work in present times where it is headed and what needs to be done about it Smith this volume we encourage readers to dip into this volume randomly rather than in sequential order While doing so it is important to be mindful that these challenges do not exist in isolation of each other rather they are inextricably linked in myriad ways Each one of these challenges requires consideration of classroom spaces the individuals who occupy these spaces and how these spaces are influenced by external forces Tupper this volume We invite you to take up a challenge

The Journal of Education ,1891 **Rethinking Work and Learning** Peter Willis,Stephen Mckenzie,Roger Harris,2008-11-02 Rethinking a Sustainable Society Alan Mayne The world has already passed the midway point for achieving by 2015 the eight Millennium Development Goals for a more peaceful prosperous and just world that were set by the United Nations in the wake of its inspirational Millennium Dec 1 laration in 2000 These goals range from combating poverty hunger and disease to empowering women and ensuring environmental sustainability However Ban Ki Moon the United Nations Secretary General conceded in 2007 that progress to date has been mixed During 2008 the head of the United Nations World Food P gramme cautioned that because of the surge in world commodity prices the program had insufficient money to stave off global malnutrition and the World Health Or nization warned of a global crisis in water and

sanitation Depressing news accounts accumulate about opportunities missed to achieve a fairer world order and ecological sustainability the manipulation of election results in Africa human rights abuses in China 4000 Americans dead and another nation torn apart by a senseless and protracted war in Iraq and weasel words by the world's political leadership in the lead up to negotiations for a climate change deal in 2009 that is supposed to stabilize global carbon dioxide emissions It is clear that the parameters of the debates that drive progressive policy change urgently require repositioning and energizing As is shown by the contributors to Rethinking work and learning experts in the humanities and social sciences HASS could have an important role to play in this process
