problems that pertain to the aesthetics of modified environments as well as new insights concerning the generation and appreciation of landscapes and environments that fall between non human nature and human culture including gardens agricultural and ecologically restored landscapes and land and ecological art works

**The Art and Philosophy of the Garden** David E. W. Fenner, Ethan Fenner, 2024 In TThe Art and Philosophy of the Garden philosopher David Fenner and botanist Ethan Fenner examine the philosophical ideas lying behind one of the most universal human activities They strip away our assumptions and take a close look at gardens starting with a definition of what a garden is and argue for a particularly way of understanding their aesthetic properties Fenner and Fenner make the case that many gardens have a claim to being legitimate works of art Their comprehensive and accessible discussion contributes to the resurgence of the theory of gardens and gardening and will also interest any thoughtful person who cares about gardens

**Art, Ethics and Environment** Ólafur Páll Jónsson, Æsa Sigurjónsdóttir, 2009-03-26 Nature has been a recurrent theme in arts and philosophy for several decades Nature is experienced in variety of contexts artists have been enacting with nature as phenomena material space environment or simply as a place or an idea In philosophy this is evidenced by an increasing interest in environmental ethics and aesthetics as well as in philosophy of biology and metaphysics In the 1960s new affinities between art and nature developed and became among the characteristics of contemporary art Environmental approaches became essential and artists were engaging the public closely with social and physical spaces Generating processes rather than creating objects both in nature as well as in the urban landscape artists reintroduced art into nature and nature into art and opened up new ways of engaging environment creating non permanent artworks which produced a new understanding of creativity that following generations are still exploring The distinction between art and nature became increasingly blurred at the same time as the ancient dichotomy of culture and nature became controversial With the rise of environmental ethics in the 1970s philosophers began discussing nature as an independent source of moral values rather than a mere stage for moral life deriving its value from relations among humans It has both been suggested that nature might have independent moral value much like persons are thought to have such value or that nature can be an active participant in a morally virtuous life Both aesthetics of nature and environmental ethics have become established fields in contemporary philosophy with their distinct bibliography to draw on But even if distinct and properly so these two new fields might be more closely related than often suggested The aim of this collection is to bring together different trends in thinking about nature and value that are distinctive of these changing moods in art and philosophy and to juxtapose them with some other ways of thinking about these issues such as economics and religion The authors include Holmes Rolston III Antje von Graevenitz Roger Pouivet Eric Palazzo and Emily Brady The essays and artworks in this volume derive from the conference Nature in the Kingdom of Ends held in Selfoss Iceland on June 11th and 12th 2005

,2025-01-02 Human flourishing depends upon the mental health of the individuals Throughout history various cultural traditions have established and practiced diverse strategies to maintain their community members mental health treat their mental illness and enhance their well being They range from spiritual disciplines religious rituals and philosophical training to communal activities educational instructions and community support It is noteworthy that aesthetic objects and activities are frequently integrated into these strategies They include visual arts music dance story telling theatre and occasions and events made special by certain foods drinks decorations clothes and fragrance This long held and widely practiced integration of aesthetics into promotion of mental health testifies to the power of the aesthetic to affect the well being of humans and their communities The world s major philosophies and religious traditions have recognized this power of the aesthetic For example Plato s proposed censorship of the arts in his utopian Republic indicates his acknowledgement of and a respect for the power of the arts to mold the citizens psyche and character Confucianism also utilizes arts and rituals to promote moral virtues Finally Buddhism teaches the cultivation of mindful practice for human flourishing by developing an alternative relationship with present moment experience such as suffering and distress Today the most dominant methods of treating mental illness in the West are psychotherapy psychology and psychiatry methodologies and practices established and developed in Europe since the nineteenth century Ever since the birth of art and poetry its purpose has been to inspire stir and move people This handbook addresses the valuable role aesthetics plays in psychotherapy and psychiatry exploring both theory and practice **Literature and Theology**

Heather Walton,2016-12-05 This book explores current trends in the interdisciplinary study of literature and theology an area of academic activity that has developed dramatically in the past twenty years The field of study originated from the impetus to embrace the richness of imaginative resources in theological reflection and was stimulated by the re emergence of the sacred in contemporary theory Since the mid 90s critical theory has undergone a number of significant transformations theology has become a subject of public concern and the boundaries between sacred and cultural texts have become increasingly unstable This book brings together the work of leading scholars in the field with that of emerging voices Offering an important resource for the growing number of postgraduate courses

exploring the relation between religion and culture in the contemporary context this book delineates current trends in interdisciplinary debate as well as tracing emerging configurations *Raw: Architectural Engagements with Nature* Solveig Bøe, Hege Charlotte Faber, 2016-04-08 Through cross disciplinary explorations of and engagements with nature as a forming part of architecture this volume sheds light on the concepts of both nature and architecture Nature is examined in a raw intermediary state where it is noticeable as nature despite but at the same time through man's effort at creating form This is done by approaching nature from the perspective of architecture understood not only as concrete buildings but as a fundamental human way both of being in and relating to the world Man finds and forms places where life may take place Consequently architecture may be understood as ranging from the simple mark on the ground and primitive enclosure to the contemporary megalopolis Nature inheres in many aesthetic forms of expression In architecture however nature emerges with a particular power and clarity which makes architecture a raw kind of art Even though other forms of art as well as aesthetic phenomena outside the arts are addressed the analogy to architecture will be evident and important Thus by using the concept of raw as a focal point this book provides new approaches to architecture in a broad sense as well as other aesthetic and artistic practices and will be of interest to readers from different fields of the arts and humanities spanning from philosophy and theology to history of art architecture and music *The Sublime in Schopenhauer's Philosophy* Bart Vandenabeele, 2015-09-01 The Sublime in Schopenhauer's Philosophy transforms our understanding of Schopenhauer's aesthetics and anthropology Vandenabeele seeks ultimately to rework Schopenhauer's theory into a viable form so as to establish the sublime as a distinctive aesthetic category with a broader existential and metaphysical significance

**Dictionary of Twentieth-Century British Philosophers** Stuart Brown, 2005-06-01 This is a two volume work with entries on individuals who made some contribution to philosophy in the period 1900 to 1960 or soon after The entries deal with the whole philosophical work of an individual or in the case of philosophers still living their whole work to date Typically the individuals included have been born by 1935 and by now have made their main contributions Contributions to the subject typically take the form of books or journal articles but influential teachers and people otherwise important in the world of philosophy may also be included The dictionary includes amateurs as well as professional philosophers and where appropriate thinkers whose main discipline was outside philosophy There are special problems about the term British in the twentieth century partly because of human migration partly because of decolonialization and the changing denotation of the term The intention has been to include not only those who were British subjects at least for a significant part of their lives even if they mostly lived outside what is now the U K but also people who spent a significant part of their lives in Britain itself irrespective of their nationality or country of origin In the first category are included for instance a number of people who were born and educated in Britain but who subsequently taught in universities abroad In the second category are included those who were born elsewhere but who came to Britain and contributed to its philosophical culture **Sublimity** James

Kirwan,2014-02-04 Sublimity addresses the nature of the sublime experience itself and the function that experience has played and continues to play within aesthetic discourse The book both updates and revises existing treatments of the sublime in the eighteenth century examines its neglected role in the nineteenth century aesthetics and analyzes the significance of the modifications the concept has undergone in order to serve the interests of contemporary aesthetics The book thus offers the most comprehensive coverage of the history of the sublime available      **Meaning** David E. Cooper,2014-12-18 Meaning

is one of our most central and most ubiquitous concepts Anything at all may in suitable contexts have meaning ascribed to it In this wide ranging book David Cooper departs from the usual focus on linguistic meaning to discuss how works of art ceremony social action bodily gesture and the purpose of life can all be meaningful He argues that the notion of meaning is best approached by considering what we accept as explanations of meaning in everyday practice and shows that in these situations we are explaining the appropriate fit of an item whether a word or an artwork with something larger than or outside of itself This fuller account of meaning explores questions of the meaning of meaning and tackles issues such as whether meaning is just a misleading folk term for something more basic whether there really is meaning at all and whether we should strive for meaning or let our lives just be rather than mean By taking the problem of meaning out of the technical philosophy of language and providing a more general account Cooper is able to offer new insights into the import function and status of meaning that will be of interest not only to philosophers of language but to students and philosophers working in areas such as epistemology and metaphysics      Aesthetics David E. Cooper,2019-04-08 The newly expanded and revised

edition of Cooper's popular anthology featuring classic writings on aesthetics both historical and contemporary The second edition of this bestselling anthology collects essays of canonical significance in aesthetics and the philosophy of art featuring a wide range of topics from the nature of beauty and the criteria for aesthetic judgement to the value of art and the appreciation of nature Includes texts by classical philosophers like Plato and Kant alongside essays from art critics like Clive Bell with new readings from Leonardo da Vinci Oscar Wilde Walter Pater Ronald W Hepburn and Arthur C Danto among others Intersperses philosophical scholarship with diverse contributions from artists poets novelists and critics Broadens the scope of aesthetics beyond the Western tradition including important texts by Asian philosophers from Mo Tzu to Tanizaki Includes a fully updated introduction to the discipline written by the editor as well as prefaces to each text and chapter specific lists of further reading      The Aesthetic in Kant James Kirwan,2006-03-24 Kant's Critique of the Power of Judgment

is widely held to be the seminal work of modern aesthetics In recent years it has been the focus of intense interest and debate not only in philosophy but also in literary theory and all disciplines concerned with the aesthetic The Aesthetic in Kant is a new reading of Kant's problematic text It draws upon the great volume of recent philosophical work on this classic text and on the context of eighteenth century aesthetics Kant's work is used as a basis on which to construct a radical alternative to the antinomy of taste the basic problem of the aesthetic In Kant's account is a theory of the aesthetic that far from

establishing its disinterested nature instead makes it symptomatic of what Kant himself describes as the ineradicable human tendency to entertain fantastic desires

**Aesthetics of the Familiar** Yuriko Saito, 2017 Yuriko Saito explores the nature and significance of the aesthetic dimensions of people's everyday life. Everyday aesthetics has the recognized value of enriching one's life experiences and sharpening one's attentiveness and sensibility. Saito draws out its broader importance for how we make our worlds environmentally morally as citizens and consumers. Saito urges that we have a social responsibility to encourage cultivation of aesthetic literacy and vigilance against aesthetic manipulation. Yuriko Saito argues that ultimately everyday aesthetics can be an effective instrument for directing the humanity's collective and cumulative world-making project for the betterment of all its inhabitants. Everyday aesthetics has been seen as a challenge to contemporary Anglo-American aesthetics discourse which is dominated by the discussion of art and beauty. Saito responds to controversies about the nature, boundary, and status of everyday aesthetics and argues for its legitimacy. She highlights the multi-faceted aesthetic dimensions of everyday life that are not fully accounted for by the commonly held account of defamiliarizing the familiar.

*The Iconic Imagination* Douglas Hedley, 2016-02-25 Is it merely an accident of English etymology that imagination is cognate with image? Despite the iconoclasm shared to a greater or lesser extent by all Abrahamic faiths, theism tends to assert a link between beauty, goodness, and truth, all of which are viewed as Divine attributes. Douglas Hedley argues that religious ideas can be presented in a sensory form, especially in aesthetic works. Drawing explicitly on a Platonic metaphysics of the image as a bearer of transcendence, *The Iconic Imagination* shows the singular capacity and power of images to represent the transcendent in the traditions of Christianity, Judaism, Hinduism, and Islam. In opposition to cold abstraction and narrow asceticism, Hedley shows that the image furnishes a vision of the eternal through the visible and temporal.
