Readings for the Economics of Money, Banking, and Financial Markets James W. Eaton, Frederic S. Mishkin, 1993 **The Creators of Inside Money** D. Gareth Thomas, 2018-06-26 The book explores the endogenous creators of inside money the commercial banks and their key role in igniting the 2007 8 monetary crisis and the aftermath of the Great Recession This is an area of study overlooked by the traditional approach in the form of neo classical analysis a body of theory based on a barter system of exchange Money has evolved from a construct of barter to become a medium of exchange based on fiat money and loan creation by the banking system underpinned by legal tender and therefore a creature of law It is not a phenomenon exogenously controlled by the monetary authorities and simply assumed to be a veil over the real economy which just determines the absolute price level This monograph in the eyes of the student represents critical thinking and the realization of a more precise formulation of the endogenous money supply with various features systematically added in an attempt to derive a fully dynamic model of the monetary system which will be straightforward to visualize and contrast with the benchmark approach
