Lines and Map Wars Mark Monmonier,2010-11-15 In Rhumb Lines and Map Wars Mark Monmonier offers an insightful richly illustrated account of the controversies surrounding Flemish cartographer Gerard Mercator s legacy He takes us back to 1569 when Mercator announced a clever method of portraying the earth on a flat surface creating the first projection to take into account the earth s roundness As Monmonier shows mariners benefited most from Mercator s projection which allowed for easy navigation of the high seas with rhumb lines clear cut routes with a constant compass bearing for true direction But the projection s popularity among nineteenth century sailors led to its overuse often in inappropriate non navigational ways for wall maps world atlases and geopolitical propaganda Because it distorts the proportionate size of countries the Mercator map was criticized for inflating Europe and North America in a promotion of colonialism In 1974 German historian Arno Peters proffered his own map on which countries were ostensibly drawn in true proportion to one another In the ensuing map wars of the 1970s and 1980s these dueling projections vied for public support with varying degrees of success Widely acclaimed for his accessible intelligent books on maps and mapping Monmonier here examines the

uses and limitations of one of cartography's most significant innovations. With informed skepticism he offers insightful interpretations of why well intentioned clerics and development advocates rallied around the Peters projection which flagrantly distorted the shape of Third World nations why journalists covering the controversy ignored alternative world maps and other key issues and how a few postmodern writers defended the Peters worldview with a self serving overstatement of the power of maps. Rhumb Lines and Map Wars is vintage Monmonier historically rich beautifully written and fully engaged with the issues of our time. **Book Review Digest**, 1917 *The Rotarian*, 1992-11 Established in 1911 The Rotarian is the official magazine of Rotary International and is circulated worldwide Each issue contains feature articles columns and departments about or of interest to Rotarians Seventeen Nobel Prize winners and 19 Pulitzer Prize winners from Mahatma Gandhi to Kurt Vonnegut Jr have written for the magazine Reference Books Bulletin, 1997 *Reference and Subscription Books Reviews*, 1990 **The Teach Yourself Atlas of the World** George Philip & Son, Harold Fullard, 1964 *The Map Catalog* Joel Makower, 1986 Every kind of map and chart on Earth and even some above it
