Almost $\frac{3}{4}$ of the Earth's surface is water. Our home is called The Blue Planet, because seen from the space the earth is blue, due to the oceans. There are 4 oceans: the Atlantic, the Pacific, the Indian Ocean and the Arctic Ocean. They represent an active and alive environment, with an incredible diversity of life: whales, dolphins, sharks, walruses, octopuses, crabs, seals.

The ocean is alive due to the oxygen, which allows fish to breathe. There are more than 25,000 identified species of fish on the earth, but there are more than 15,000 which haven't been identified yet. The largest fish is the great whale shark, which can reach almost 16 metres as an adult. The most intelligent fish is the dolphin, which can communicate through ultrasonic sounds and are known to have a friendly and social behaviour.
