flows transform us humans into commodities To this new theory flows of economic elements as physical goods or money are consummated by intangible flows that cannot yet be precisely appraised at an actual or approximate value for instance workflows service flows information flows or communicational flows The theory suggests a systematic alternative to refute the human commodity framework and interrelated conjectures e g human capital human resources human assets Furthermore it exhibits that economic and societal production is fully integrated on the biosphere Conversely contemporary relativism argues for the end of theory development suspension of evidence and entrenchment of knowledge validity among local systems named as paradigms epistemes research programs truth regimes or other terms Thus relativism tacitly supports dominant theories as the human commodity framework because it preventively sabotages the creation of new theoretical explanations Disputing relativist theses intangible flow theory demonstrates that innovative theoretical explanations remain possible This book is of significant interest to students and scholars of political economy economic sociology organization economics and social theory
